

**CATALOGO  
GENERAL**  
Portobello

# Portobello Grupo

## Portobello

The Portobello unit includes the operations center in the manufacturing and technological development complex located in Tijucas (SC).

## Portobello America

Portobello America is committed to serving as a complete B2B solution for designing, manufacturing, and delivering a wide range of surface formats tailored for the U.S. market.

## Portobello shop

The group's retail unit has 163 stores, 30 of which are owned. It offers the most complete design experience in the world of ceramic tiles, accessories and the Oficina Portobello.

## PORTER

Pointer is the leading design brand in the red body ceramics industry. With operations in the Brazilian Northeast, the unit took the concept of democratic design to the market for classes B and C.

# Portobello Multicanal

Multichannel and integrated business model.

**Retail**

Portobello Grupo offers solutions for coverings and accessories, mainly ceramic and metal wares, through its own or franchised stores.

**Projects**

Great architectural projects combined with Portobello design and technology. Solutions in ventilated facades and special services.

**Services and distribution**

Solutions that generate value in the retail experience, in the integrated model, project development, distribution, installation and maintenance systems.

More than  
**70 COUNTRIES**  
served by exports.

# Portobello Multisourcing

Own production plants  
Outsourcing partners  
Specialized factories

Complete  
Solutions

**Multisizes and Slabs**

Slabs represent a new paradigm for coatings in architecture, expanding the frontiers of the use of porcelain tiles, whether for projects and spaces, or for furniture design.

**Portobello Decor**

The translation of behavior and consumption trends into Portobello products. Design, textures, materials and technology are present in our collections focused on customization.

**Infinite Walls**

Precision in reliefs that align themselves millimeter by millimeter and the search for grand formats launch a new category for walls.

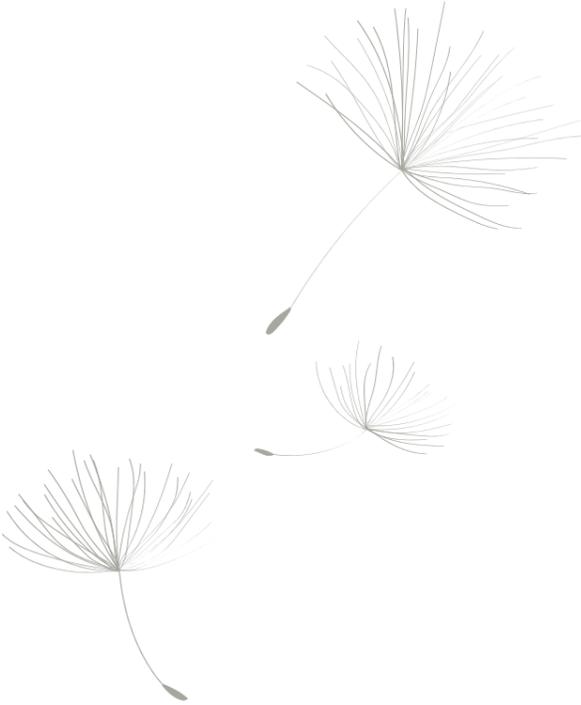

**Officina Portobello**

Unique solutions and customization systems in the art of porcelain tiles with the essence of Portobello. Innovation, design and high-quality furniture, special cuts and decor.

# Portobello Sustainability

Sustainability for Portobello means being aware of our actions and the impact of our choices. It means understanding the responsibility that comes with being an integral part of our society and ecosystem.

# Brit

Little ceramic bricks have been used since ancient times in architecture, but the English brick is more outstanding than the others.

The traditional material in England, the little brick adheres to regulations and standards defining their characteristics and shapes.

A visit to London is an exhibition of facades using different colors and shapes of little bricks, ranging from the most classic and historical to the most up-to-date, which maintain the same personality, but a more contemporary version.

Based on this look, from observing the little English bricks after some time, we created a contemporary interpretation of the beauty of this porcelain material, for covering indoor walls and facades.

## matéria\_prima

To go back to the essence is to recognize the strength of origins.

What comes first, what is the material that structures an architectural element?

Materia\_prima, essential material, traceable material, sustainable material. Pure earth. Pure water. Pure mixture. Pure clay. Materia\_prima.

The origin gives identity. It gives tones that nature embodies in earth.

Nonetheless, it is not the same clay. There is a trajectory to every tone.

\*FROM\* land to architecture.

They are processes that use fire to turn water and soil into ceramics.

Simple and necessary for a world more in tune with nature.

Oskar Metsavaht has a look that transforms the obvious and essential into desirable and required aesthetics.

Materia\_prima, what contemporary architecture expected.

Available in 20cm x 120cm and in the innovative 30cm x 120cm format, in 7 colors: neutro, ocre claro, ocre escuro, terracota, marrom, verde and azul.

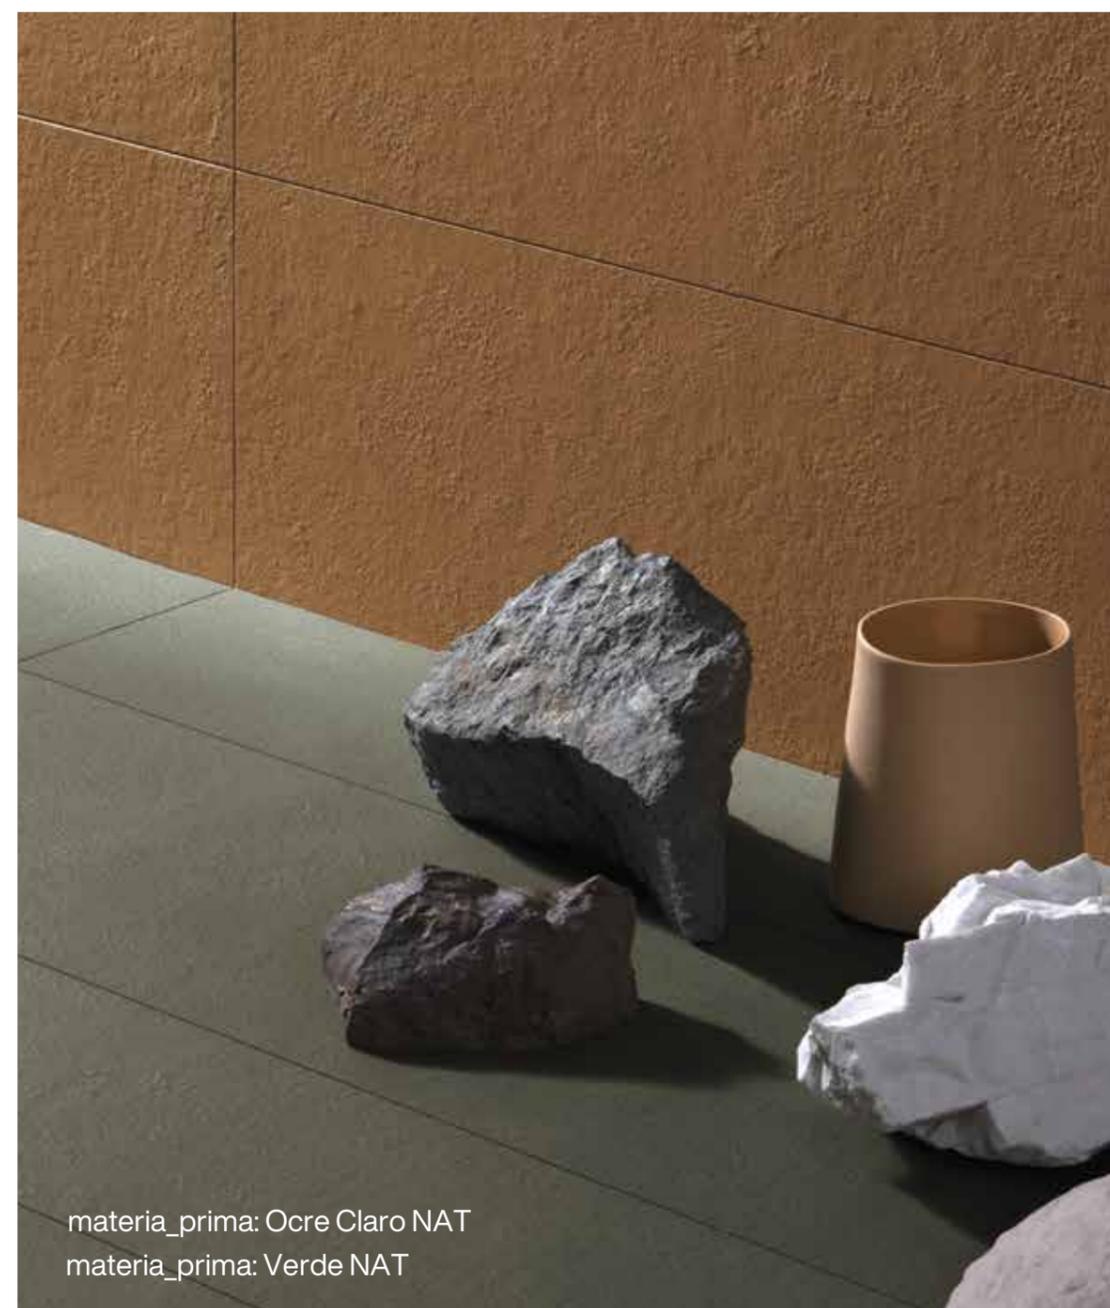

Specially created for facades, materia\_prima is 100% porcelain and can also be used on interior floors and walls.

# Terralma

Our search for the essence of the earth has led us to a deep connection with matter in its raw state and revealed characteristics that opened up new possibilities for thinking about the concept of cladding.

Terralma brings the origin of the material that has the power to transform but preserves its essence.

A color analysis, starting from an immersion in the reconnection and identity trend, resulted in an vibrant palette of earthy tones, complemented by cool, nature-inspired nuances.

The matte surface connects joints and special mortar in the same color chart to create a system of accessories for unique compositions.

In 9x37 longline format for floors and walls, Terralma infuses personality and inspires new forms of expression for unique environments.

## Urban Mood

An authentic reinterpretation of urban elements that, together, unveil the plurality of large centers.

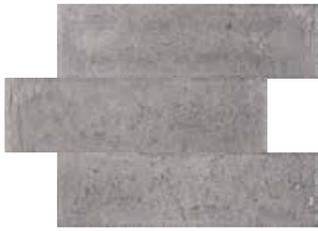

Urban Mood is the balance between contemporary atmosphere and traditional references.

The reproduction of concrete in cool hues, in the democratic 80x80, is the basis of this concept.

Groove, Brit, and Parkour have different surfaces revealing colors, textures, and reliefs, building up the possibilities for all areas in the house.

# Cape Cod

There are places that create unique lifestyles, a certain way of being unpretentious but also sophisticated, and with experiences that make it all worthwhile.

Cape Cod, a peninsula which is north of New York, with houses in a style molded by its first inhabitants - local fishermen, blessed by the extensive coastline of golden sands, is one of these places.

Time and history unfold in Cape Cod as if nothing had changed, bearing the marks of simplicity and local authenticity.

Cape Cod, Portobello's new surface, is immersed in this atmosphere.

A concrete that bears the marks of time, as if the wood of those pioneering houses left the spirit of living well behind.

Soft, but with personality, Cape Cod invites you into a cozy environment, illuminated by warm colors and a texture that makes you want to touch it.

# Dansk

The origins of visual purity, functionality, and formal simplicity are Eastern, but have been improved and conquered their own identity representing Nordic thinking.

Portobello has Immersed in the daily life of Copenhagen, with the goal of capturing the essence of that culture.

A team of Brazilian architects with the Portobello creative team immersed themselves around architecture and design, observed the cultural traditions and discovered Hygge - an untranslated word that expresses the Danish way of life, which values and promotes happiness and quality of life.

The first Creative Collective Portobello collaborated in creating a collection of products that, in the eyes of the group, expressed the Hygge spirit.

Metallic parquets with a brushed finish and soft colors represent the attention to details in the ambiances that look for simplicity, but without lacking form and beauty.

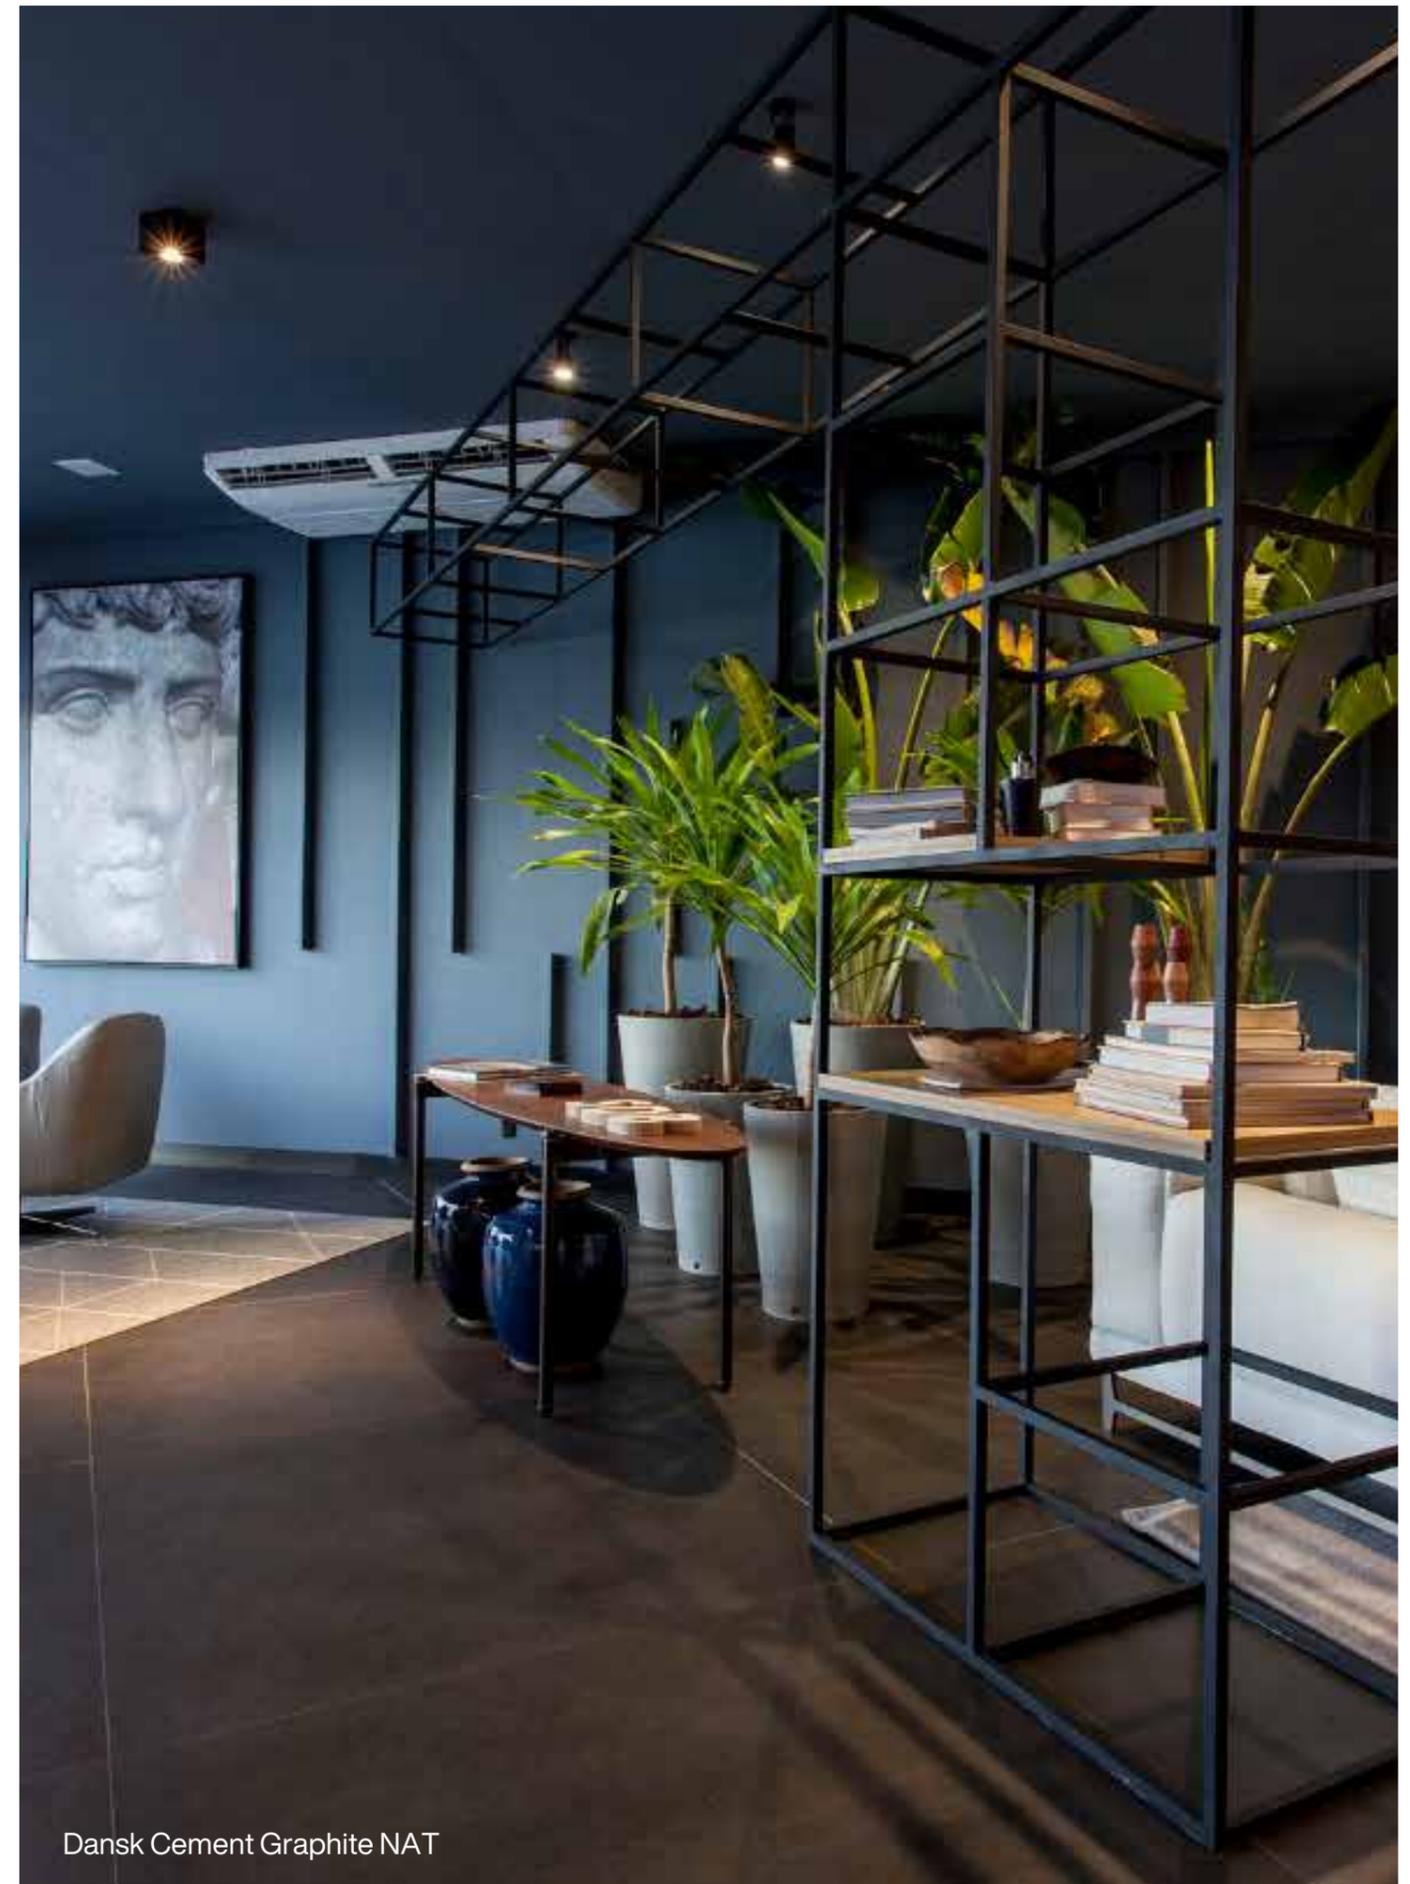

Metal profiles express the attention to the design function, taken very seriously by the Danes.

A mosaic of marble and metal, state that sophistication can also be present and celebrate the joy of living.

The reproduction of a minimalist and almost single colored cement surface in warm tones translates the search for the essential and the comfort in living spaces.

Light, one of the central elements of Hygge environments, is materialized in a candlestick developed by Officina Portobello.

The Candlelight is widely used in the Danish culture, to bring the people around you to an intimate and joyful mood.

# Fuso

A surface that expresses the multiplicity of our time.

Concrete receives diverse influences and introduces the new again.

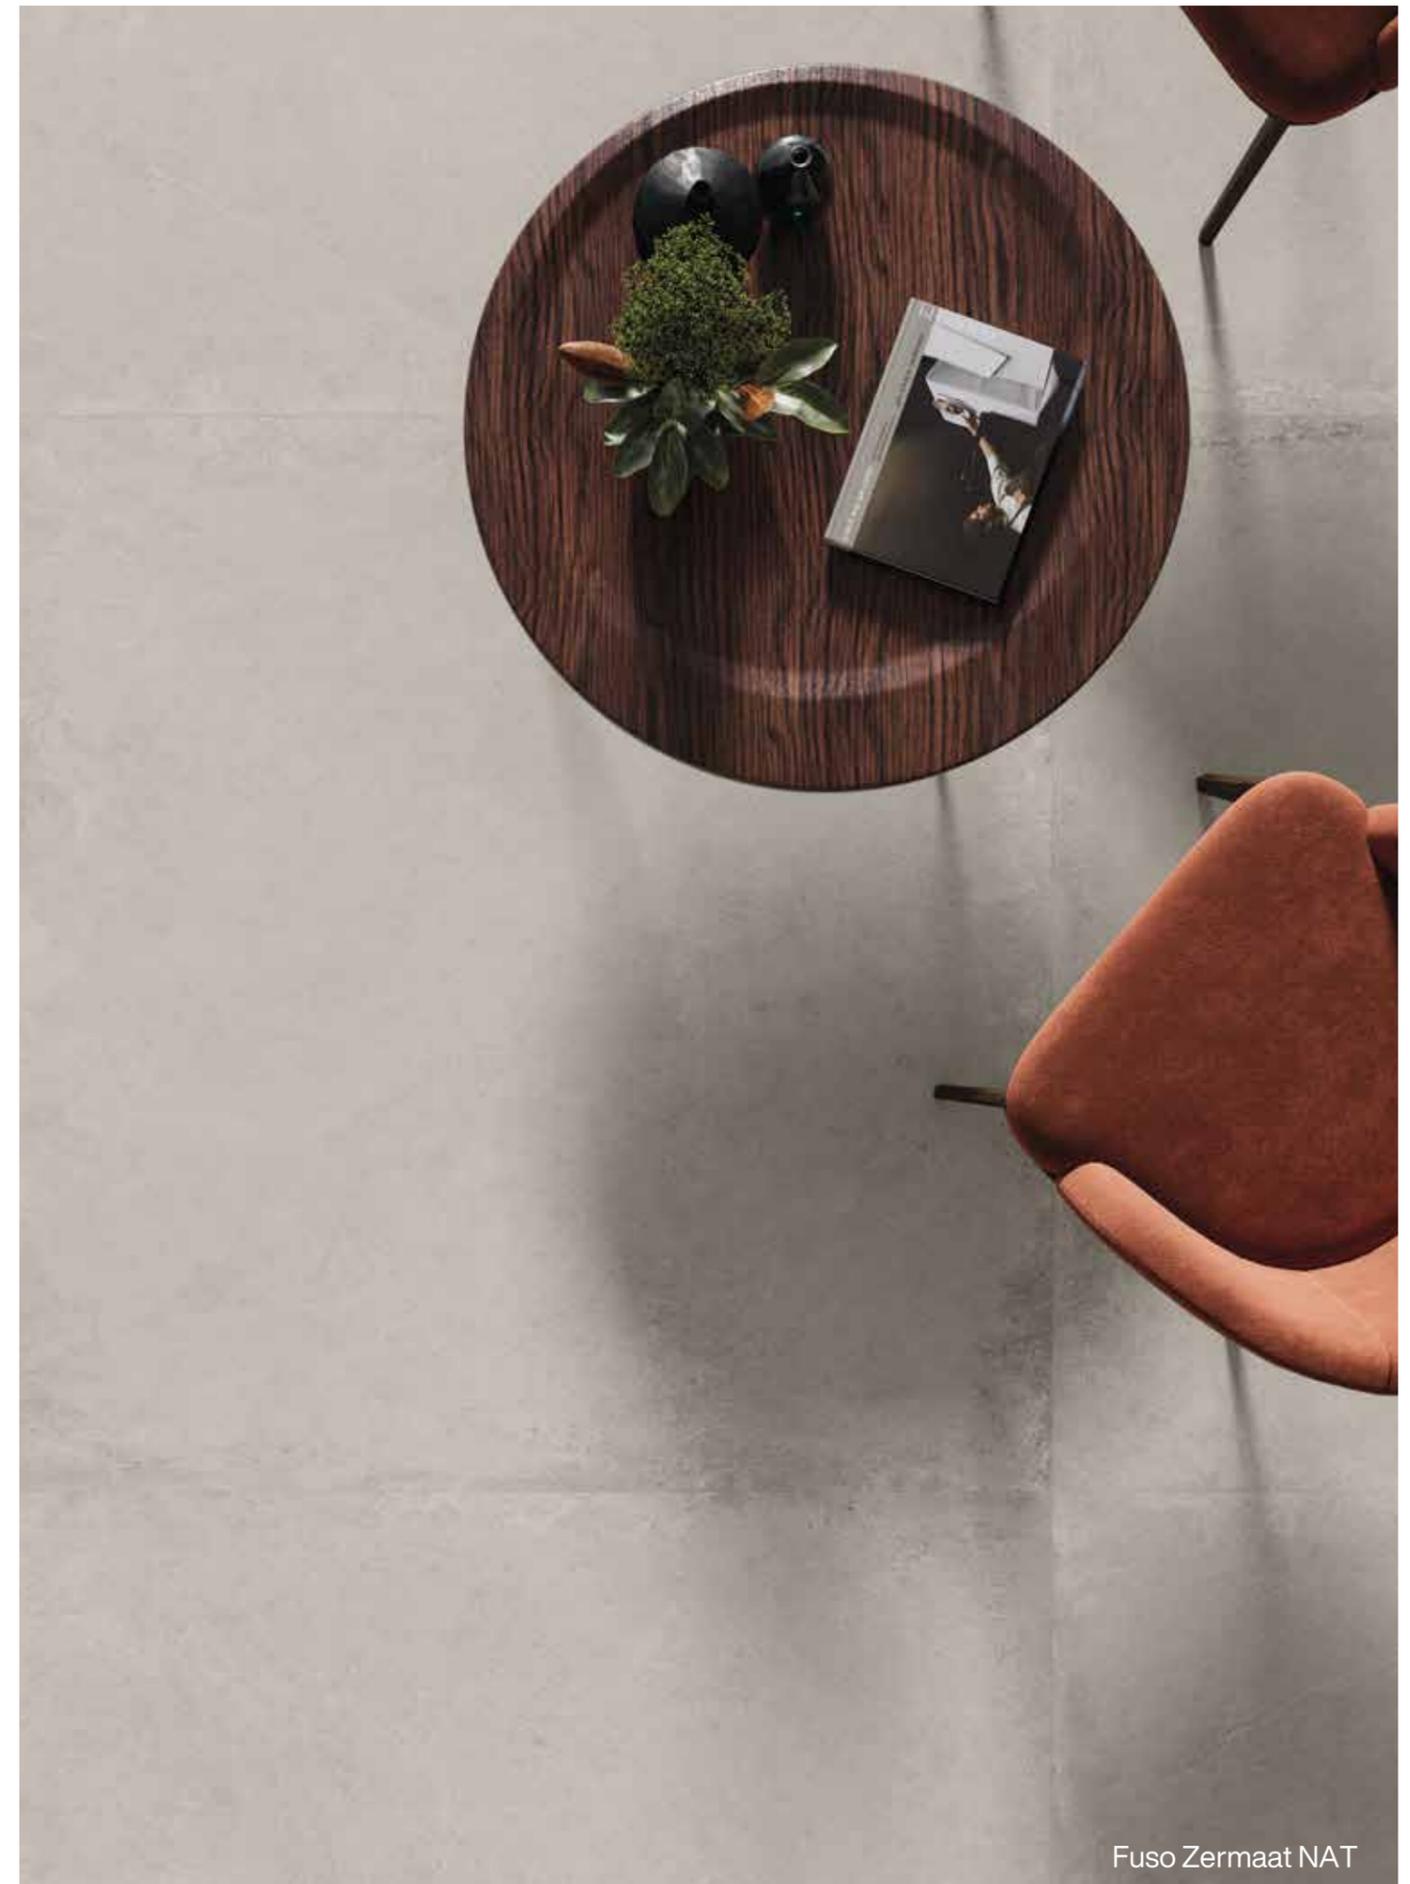

Minimalist, but not simplistic.

Memories from the adventures of Vikings, the crossing of the Alps, and the strength of Etna are print in matter.

In the 20x20 size, the classic tile gains a version that is original and contemporary.

Linea presents a mix of pieces with delicate parallel lines with a hand-drawn appearance, bringing personality and dynamism to floors and walls.

Fuso, diversity of uses and shapes for spaces that have content.

# Nord

Orientalism, a cultural movement that influenced arts in the beginning of the XIX century in Europe, was also a reference for Nordic design, which became a synthesis of beauty, simplicity and functionality.

The Nordics express minimalism in both architecture and design, creating a language without excess, full of personality, and timeless.

Several icons in furniture with Nordic design are as modern today as they were in the 50's.

The Nord line revisits the essential route of minimalism, from the East to Scandinavia.

Concrete was interpreted with a flow that simulates the effect of light on the surface, and the result is pure elegance, for timeless spaces that remain modern.

Large sizes allow greater continuity and extent for surfaces.

Nord is functional for indoor and outdoor areas, for gardens and the entire house.

For a more complete line, now in 120x120 format in external finishing.

More alternatives for indoor and outdoor use.

# Oh!Take

Oh!Take. Master of Brazilian architecture, Ruy Ohtake always takes us to experiences that surprise us.

Going beyond limits, a constant in his creative process, Ruy challenges the possibilities of material and brings out what is unusual.

The concrete and the color. Boldness and genius.

When all is said and done, the simplicity and elegance of the work envelops and enchants us.

Here, the work is superficial.

Sometimes flat, almost obvious if it weren't for the subtleties of color and mix of the small aggregates.

Sometimes organic, unusual and vibrant, creating movement in the vertical planes that we ordinarily call walls, but here deserve to be redefined.

Now these vertical planes are a blank canvas for the creator's soul.

Soul is poetry in concrete, curves and colors challenging boundaries between design and art.

Oh!Take in Slabs close-ups reveals the infinite surface to the eyes.

Colors that are timeless and smooth, however remarkable for the strength of their scale, reveal a new path to the design.

The master presents us with alternatives to what's obvious, what's gray, and what's common.

# Salt Lake

Inspired by the fascinating salt ponds, this collection stands out for the contrast of tones and the fluidity of the oxidized color details, which gives the product a remarkable personality.

The extraordinary color composition of the salt flats changes with the seasons of the year, due to the presence of natural elements that create a multiplicity of light tones in early spring, which darken in autumn-winter and become beautiful earthy patterns in summer.

The pieces stand out for their tonal richness and visual textures that create beautiful compositions.

# Sintese

Brutalist architecture, from daily coexistence with modernist works that crudely reveal concrete.

Pure, just the concrete. Concrete and its marks. The surface. The material. The Synthesis.

A route of projects from Masp to corporate buildings by Slovak architect Hans Broos, which includes the original Parque Portobello Building and Cia. Hering Building in Santa Catarina, made it possible to dive into this architectural language and its marks, printed on concrete.

Archeology as design. The evidence revealed was a reference for the process.

Every trace, every crack, every reaction with the steel, every impression of a wooden shape.

Finally, a Synthesis. Of design, of technology, of a look that selects and refines.

Sintese is the new Portobello material.

Unshakable in revealing herself pure.

# Superquadra

Concrete is always modern and transitions between many styles without being dated or seeming old-fashioned.

It is the perfect companion to a mix of other surfaces and can be the lead in solo projects.

SuperQuadra was created from this free perspective of concrete.

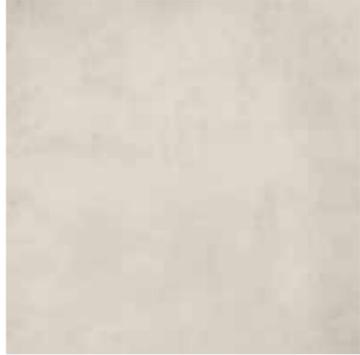

The Superblocks of Brasilia and its concept of not limiting spaces, creates continuous surfaces with fluidity of motion which inspired the new Portobello concrete.

Wood

# Amazonia

Immensity. Immense trees, immense forests, immense nature.

Given all the beauty of this nature, we rescued several species along the way.

Fragments that always bring the history of their trees.

Veins, cathedrals, knots. The language of wood.

Given all this, choices. Do things another way. The forest stands.

In ceramics, the story of the trees.

From the immensity of the Amazonia to the created surfaces.

Intentionally created to cover and express all this strength.

Jequitibá, Muiracatiara, Muirapiranga, Sucupira, Timburi.

Immensity of species.

Amazonia. Our nature.

# Araucaria

The reproduction of Araucaria, native species of the Atlantic Forest, in the South Region of Brazil.

The surface of the boards has a new texture, developed with the application of quartz micro granules and a special firing cycle.

The result is an even more natural touch and a feeling that the wood fibers have a slight relief, which provides more ambient comfort.

# Arca

The rescuing of forests, known through a trip or a story told, awakens the sensation that there is something there that must be preserved.

With this in mind, Arco was created, a gesture to protect, from the impact of time and everything else that could threaten nature's grandeur - a selection of woods that could represent an imaginary forest, with all the woods in the world.

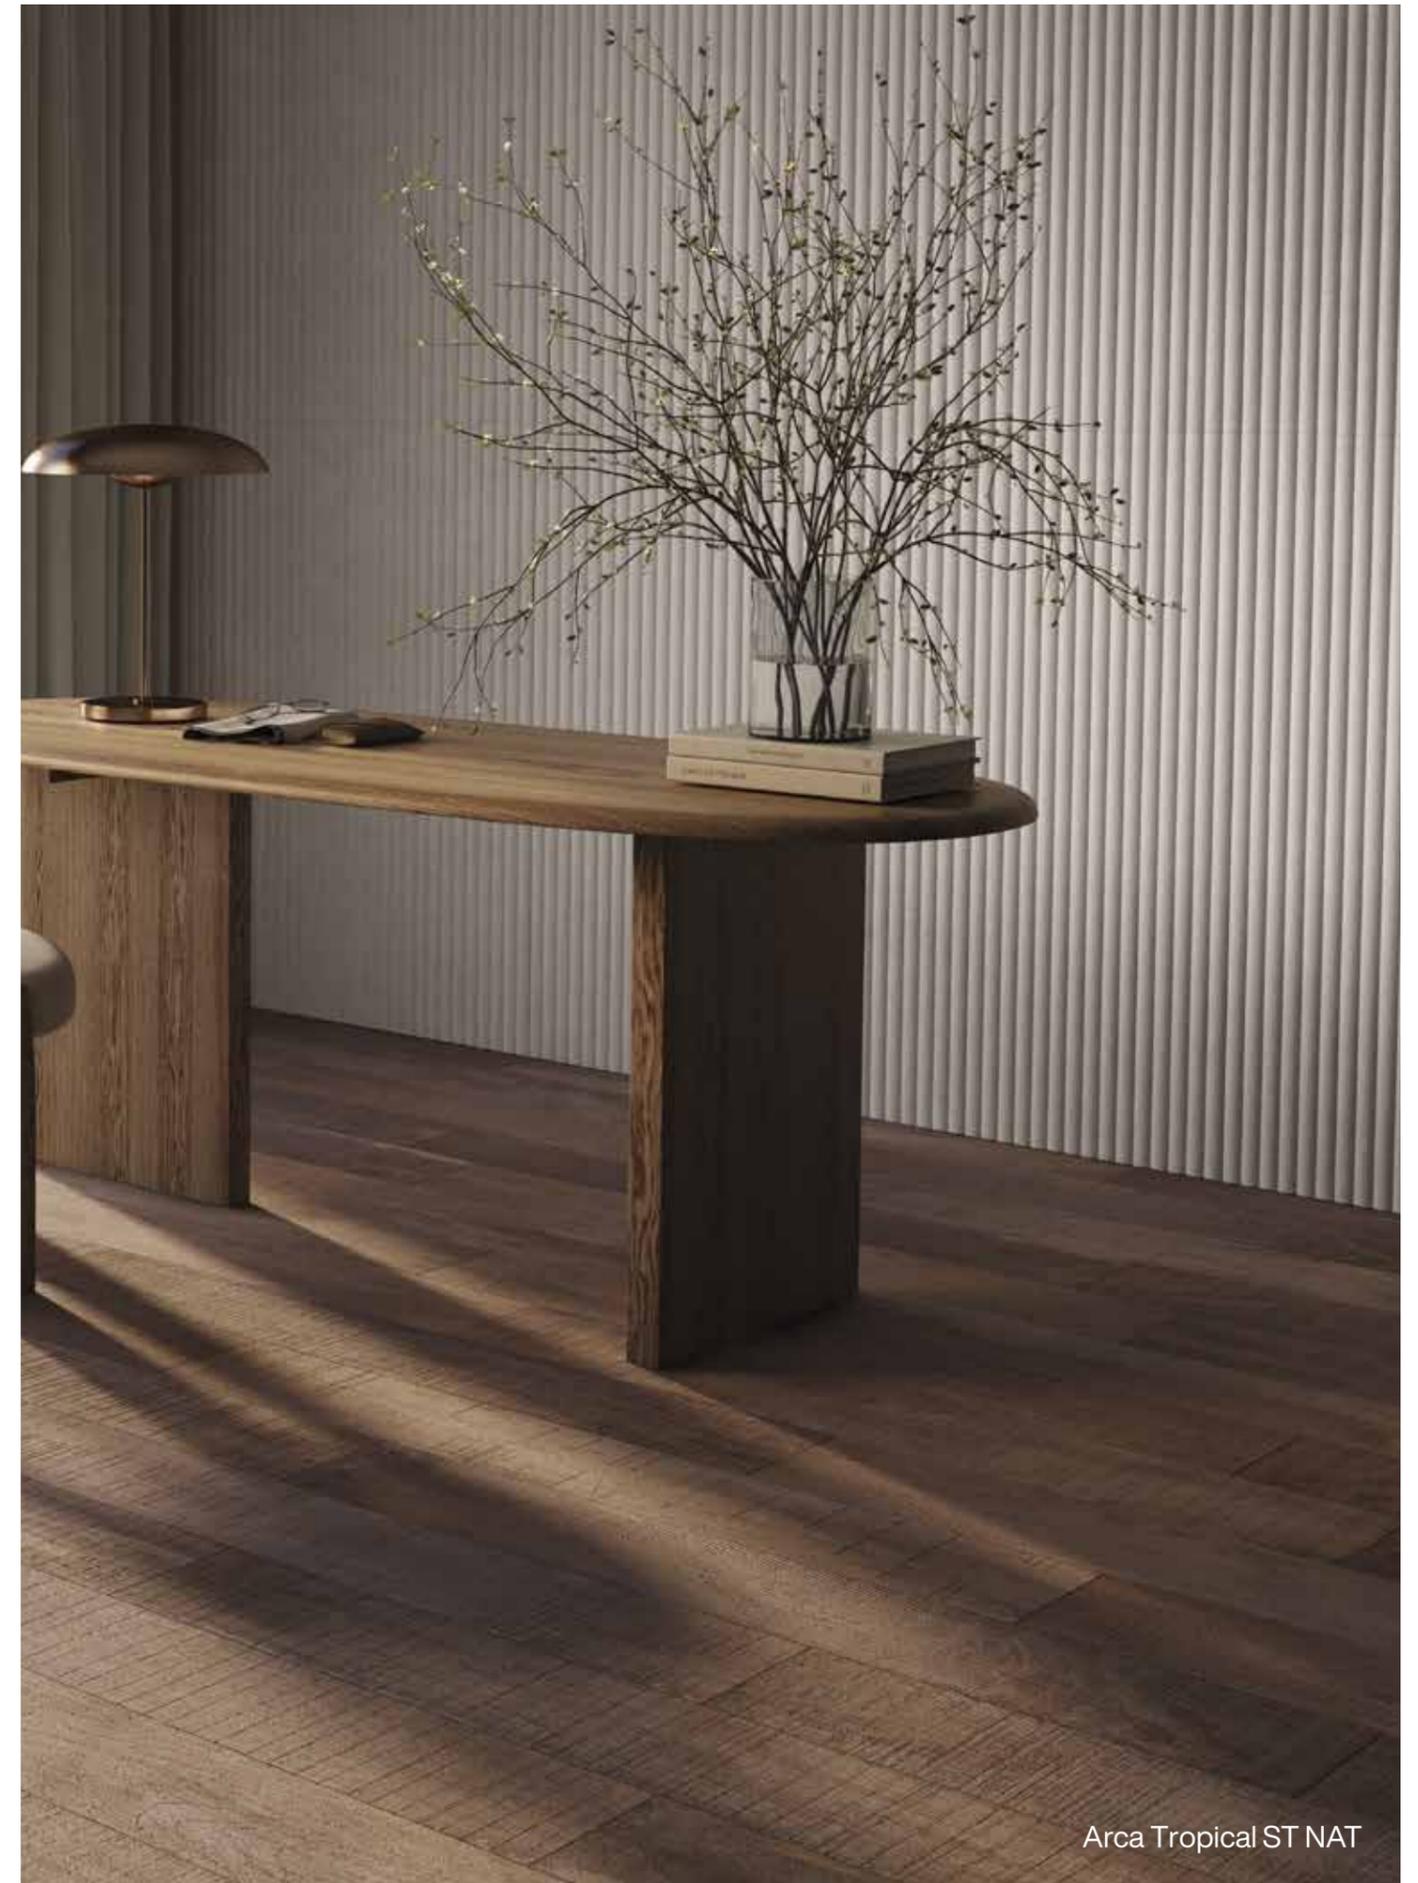

It is a simple and ambitious display, that provoked the creative work and a journey to a new surface.

Rescuing woods, discovering new species, enabling them to travel and reuniting a diverse archive of unmatched beauty, is the design challenge.

Recreating the woods, intensifying or dampening their markings, finding the best balance of new shades and cultivating a new forest – now material, now a new collection of woods, as result of a process that differentiated it and guaranteed its authenticity.

Arca Nórdic, from the gradient knots of European Oak to the earthy warmth of the tropical species, a diversity balanced with the soft tones of the light in the region.

Arca Tropical, the diversity of the trees that display themselves with more freedom, under the intense light of the tropics.

# Avantgarde

Being on the cutting edge of innovation, transcending standards and going beyond the already established, express the avant-garde movement in arts and culture in early 20th century in France.

The power of disruptive ideas to transform something consolidated inspired the recreation of the classic oak, the hardwood of European and American forests.

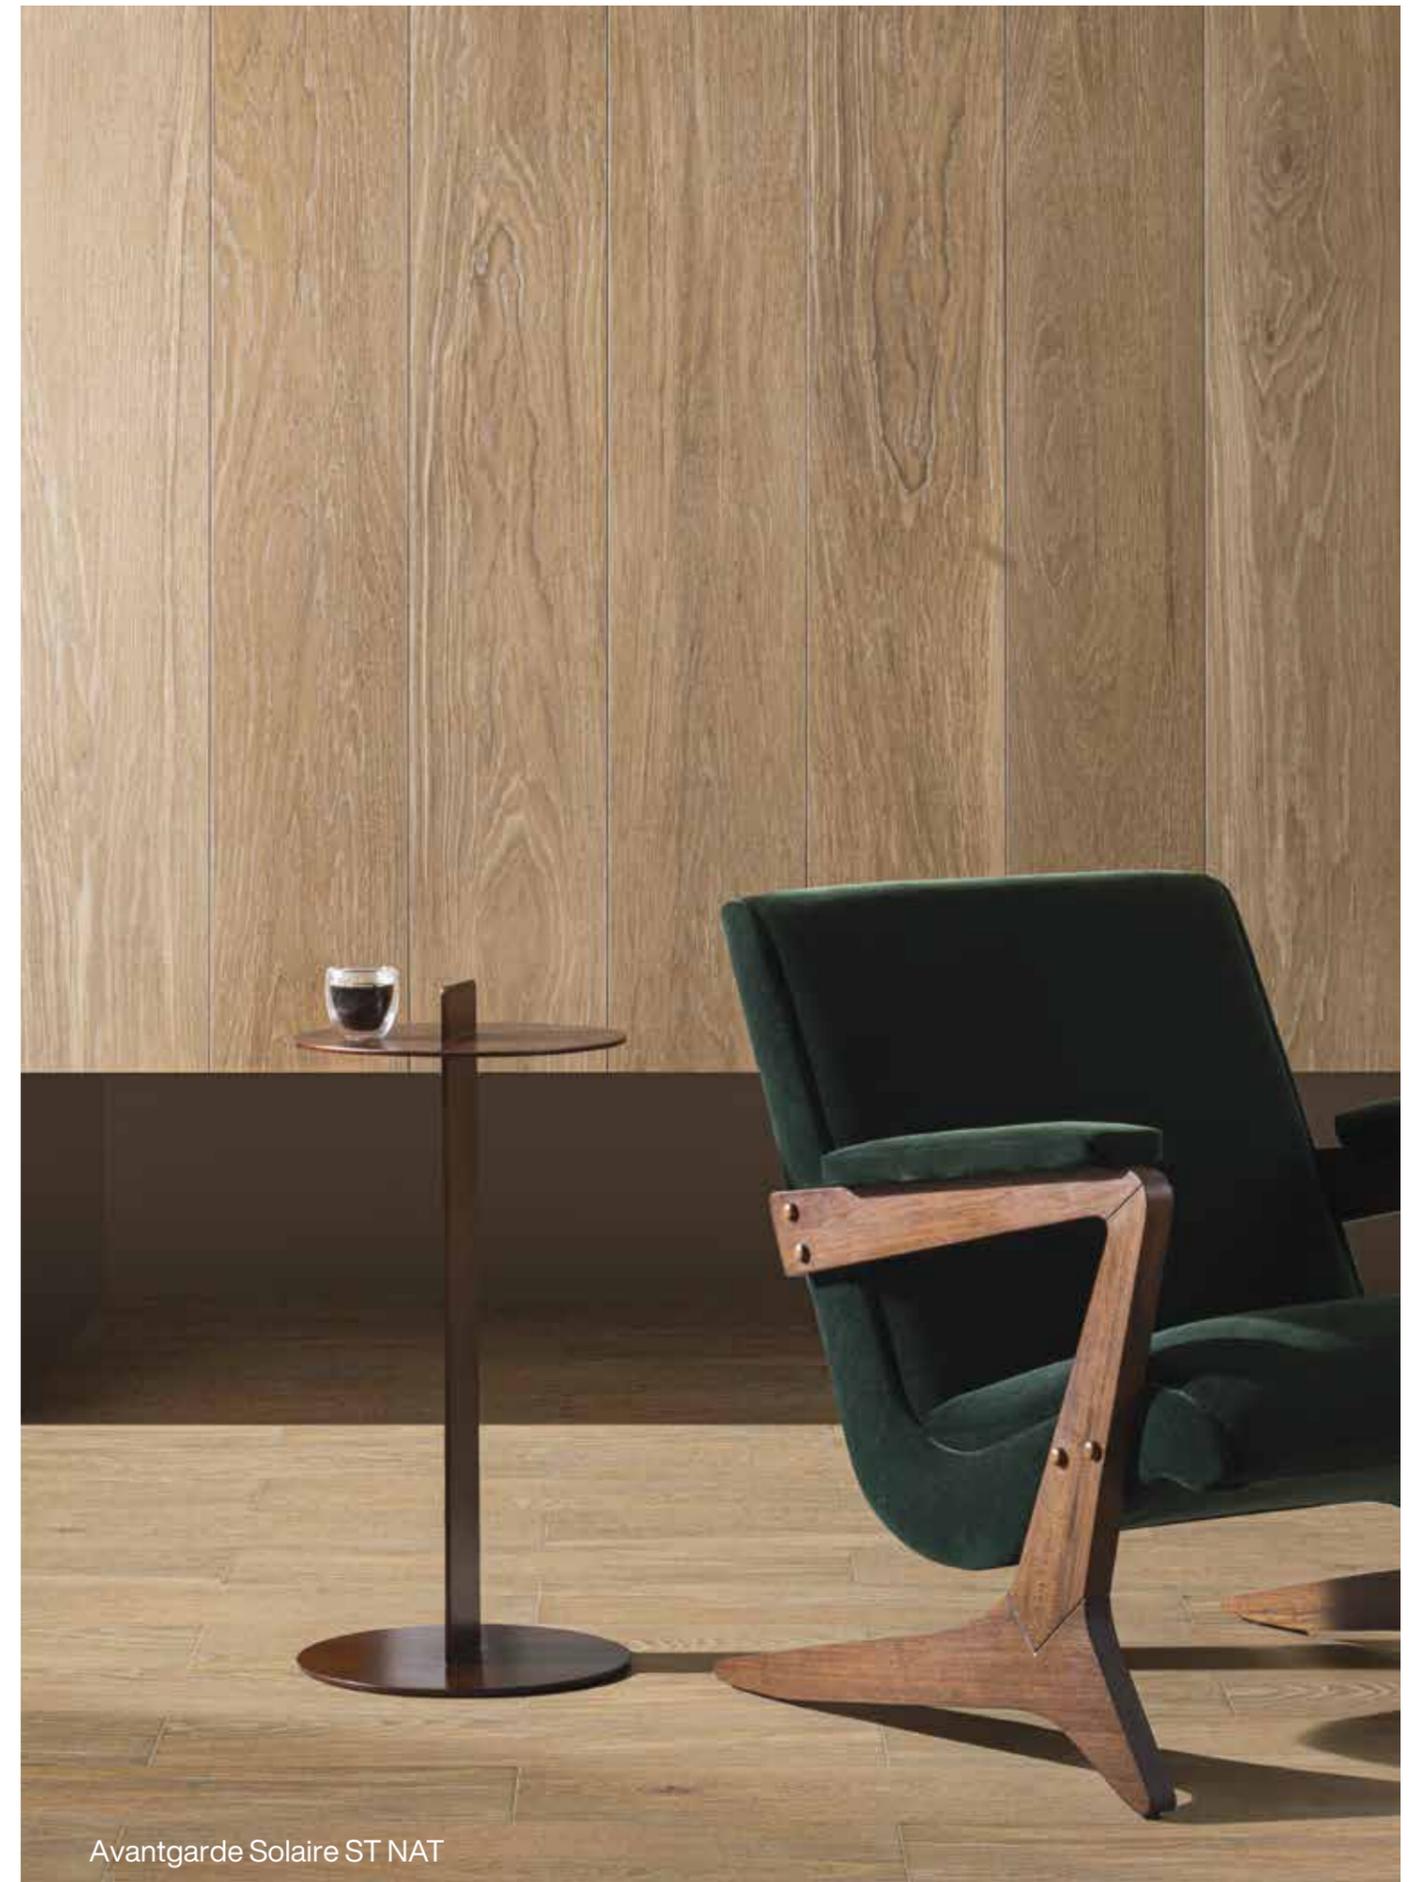

To recreate oak in porcelain tiles is to overcome design and technology challenges, it is to bring nature to still unexplored levels, it is to combine creative sensitivity with emerging innovation.

Avantgarde reproduces timeless wood in three colors and in long format 20 cm x 120 cm on a surface where the touch is the protagonist.

A texture that defies the material and provokes unexpected sensations is the touch that makes Avantgarde unique.

Super Touch – the new Portobello surface that combines the sensitivity of handmade design with the innovation achieved by technology.

Experience this new sensation.

# Boreal

Boreal forests occur only in the northern hemisphere, in a region where the soil is still thawed during the summer.

There are few and strong species that make up the flora of this region, such as firs, pines, beeches and birches.

Boreal reproduces a selection of these woods that have the light color with golden nuances and the presence of knots as common characteristics.

There are two versions: Natural that has more homogeneous tones and Mix, where the mixture of intentional tones makes a more rustic counterpoint to this more minimalist proposal.

# Ecodiversa

The color that illuminates and frames other materials is in evidence for compositions that seek warmth in minimalism, a Danish expertise.

Vit means white in the Nordic vocabulary and the Vit wood proposes a white surface over a soft Rovere that subtly enriches the purity of color.

One of the natural symbols of Finland, a light-color and hardwood tree that reaches 10 to 15 meters high, the Finnish birch is one of the noblest species of temperate forests and has great economic and cultural value to this country, a leading exporter of wood in Europe.

The light-colored wood is part of the design and architecture of northern Europe, especially in Scandinavian countries, which mainly use birch to create a "hygge" mood in the environments.

"Hygge" is a Danish word that has no translation, and means "to create a cozy atmosphere" and is pronounced "hu-ga".

Bétula is the new Portobello wood, its boards have uniform patterns and no wood knots, which form minimalist surfaces combined with the warmth that comes from the color, a warm and bright color, like the sun of a summer far away from the tropics.

## Parquet D' Olivier

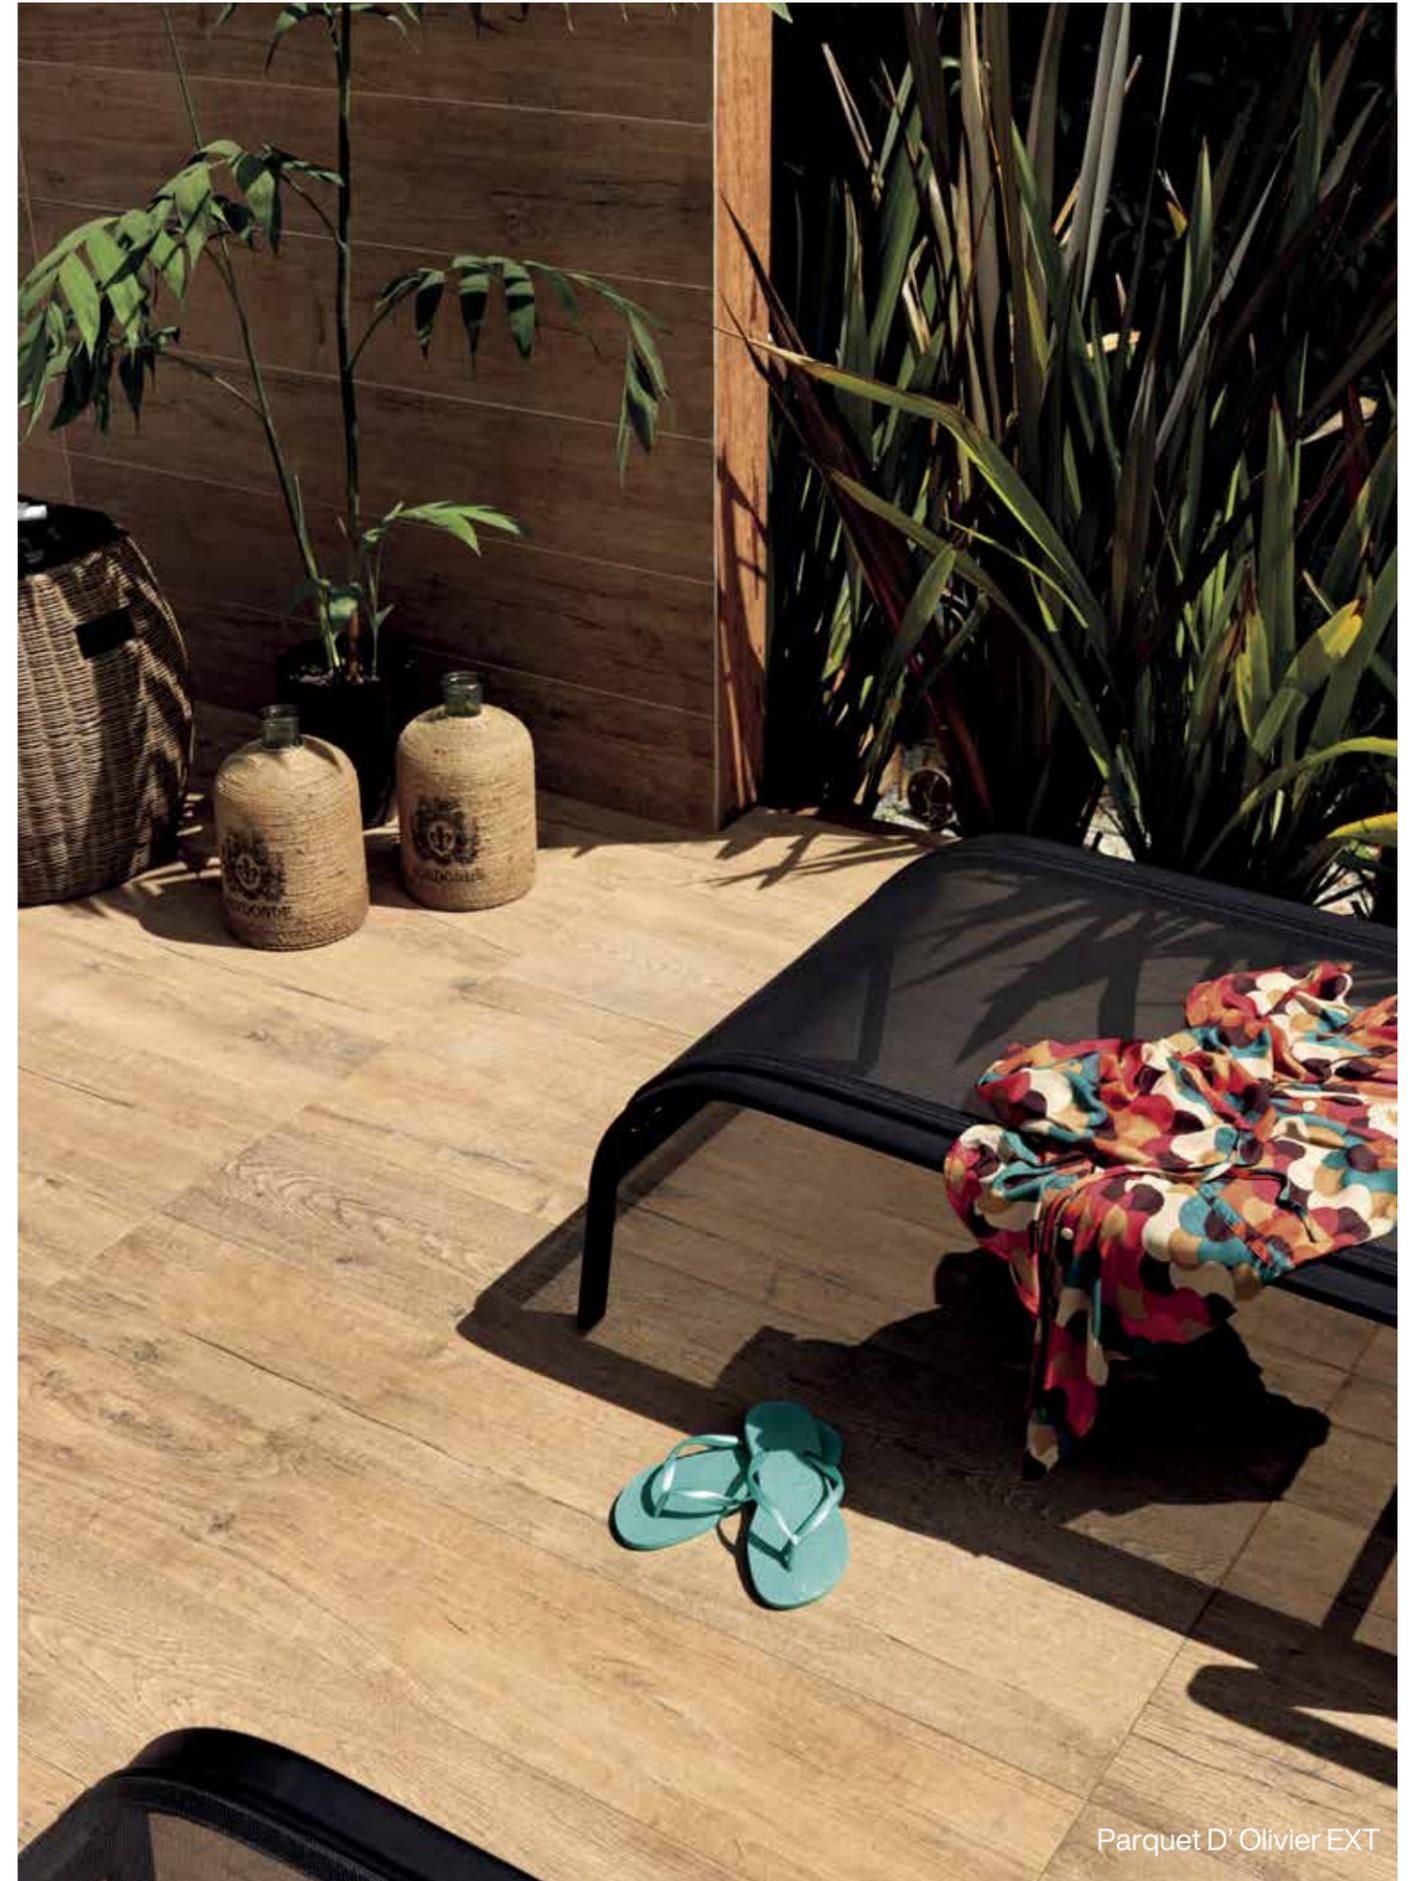

Diverse species of olive trees, this tree provides us with precious olive oil that grows in the region of Provence, in the southern part of France.

Some species are characterized by their exceptional longevity and they produce particular designs from their wooden boards, as there are knots and wide grains in a fairer matrix with very little chromatic variation as these are its main characteristic.

They are used by craftsmen and for coverings.

Our Parquet D'Olivier is used for internal and external; it is the reproduction of this exotic and noble wood.

It allures interior decorators and architects due to its 20x120 format, as well as the being the latest novelty from the Chevron composition

# Winds

Inspiration in nature with contemporary aesthetics.

A wood in which veins are inspired by winds from around the world.

Continuous and fluid, natural tones reveal a light and cozy surface in an urban language.

Scirocco, the wind that takes sand from Sahara to Rome, expresses the most intense tone.

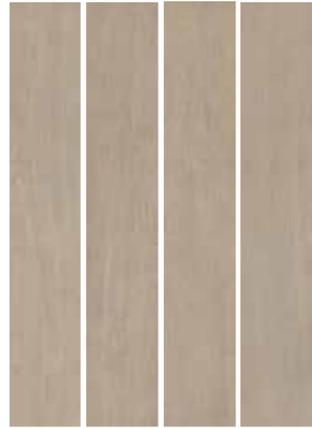

Zefiro is the light breeze from the range of colors by Winds.  
A minimal surface, ideal for indoor and outdoor spaces.

Marble

# Aeterna

In the tapestry of time, Rome, the eternal city, is a beacon of history and timeless beauty, often expressed through the local marble, Travertine.

The classic of perfect proportions, tones, and textures transcends time and is reproduced in a very pure version, based on curation by the discerning eye of design.

Aeterna is the contemporary version of noble Travertine Slabs, which are no longer available in nature, the technology and design materialize and transform into raw materials for architecture, interiors and furniture.

A new surface, from today to forever.

An impeccable selection, the most precise color, and the perfect veins are renewed, once again.

Stone

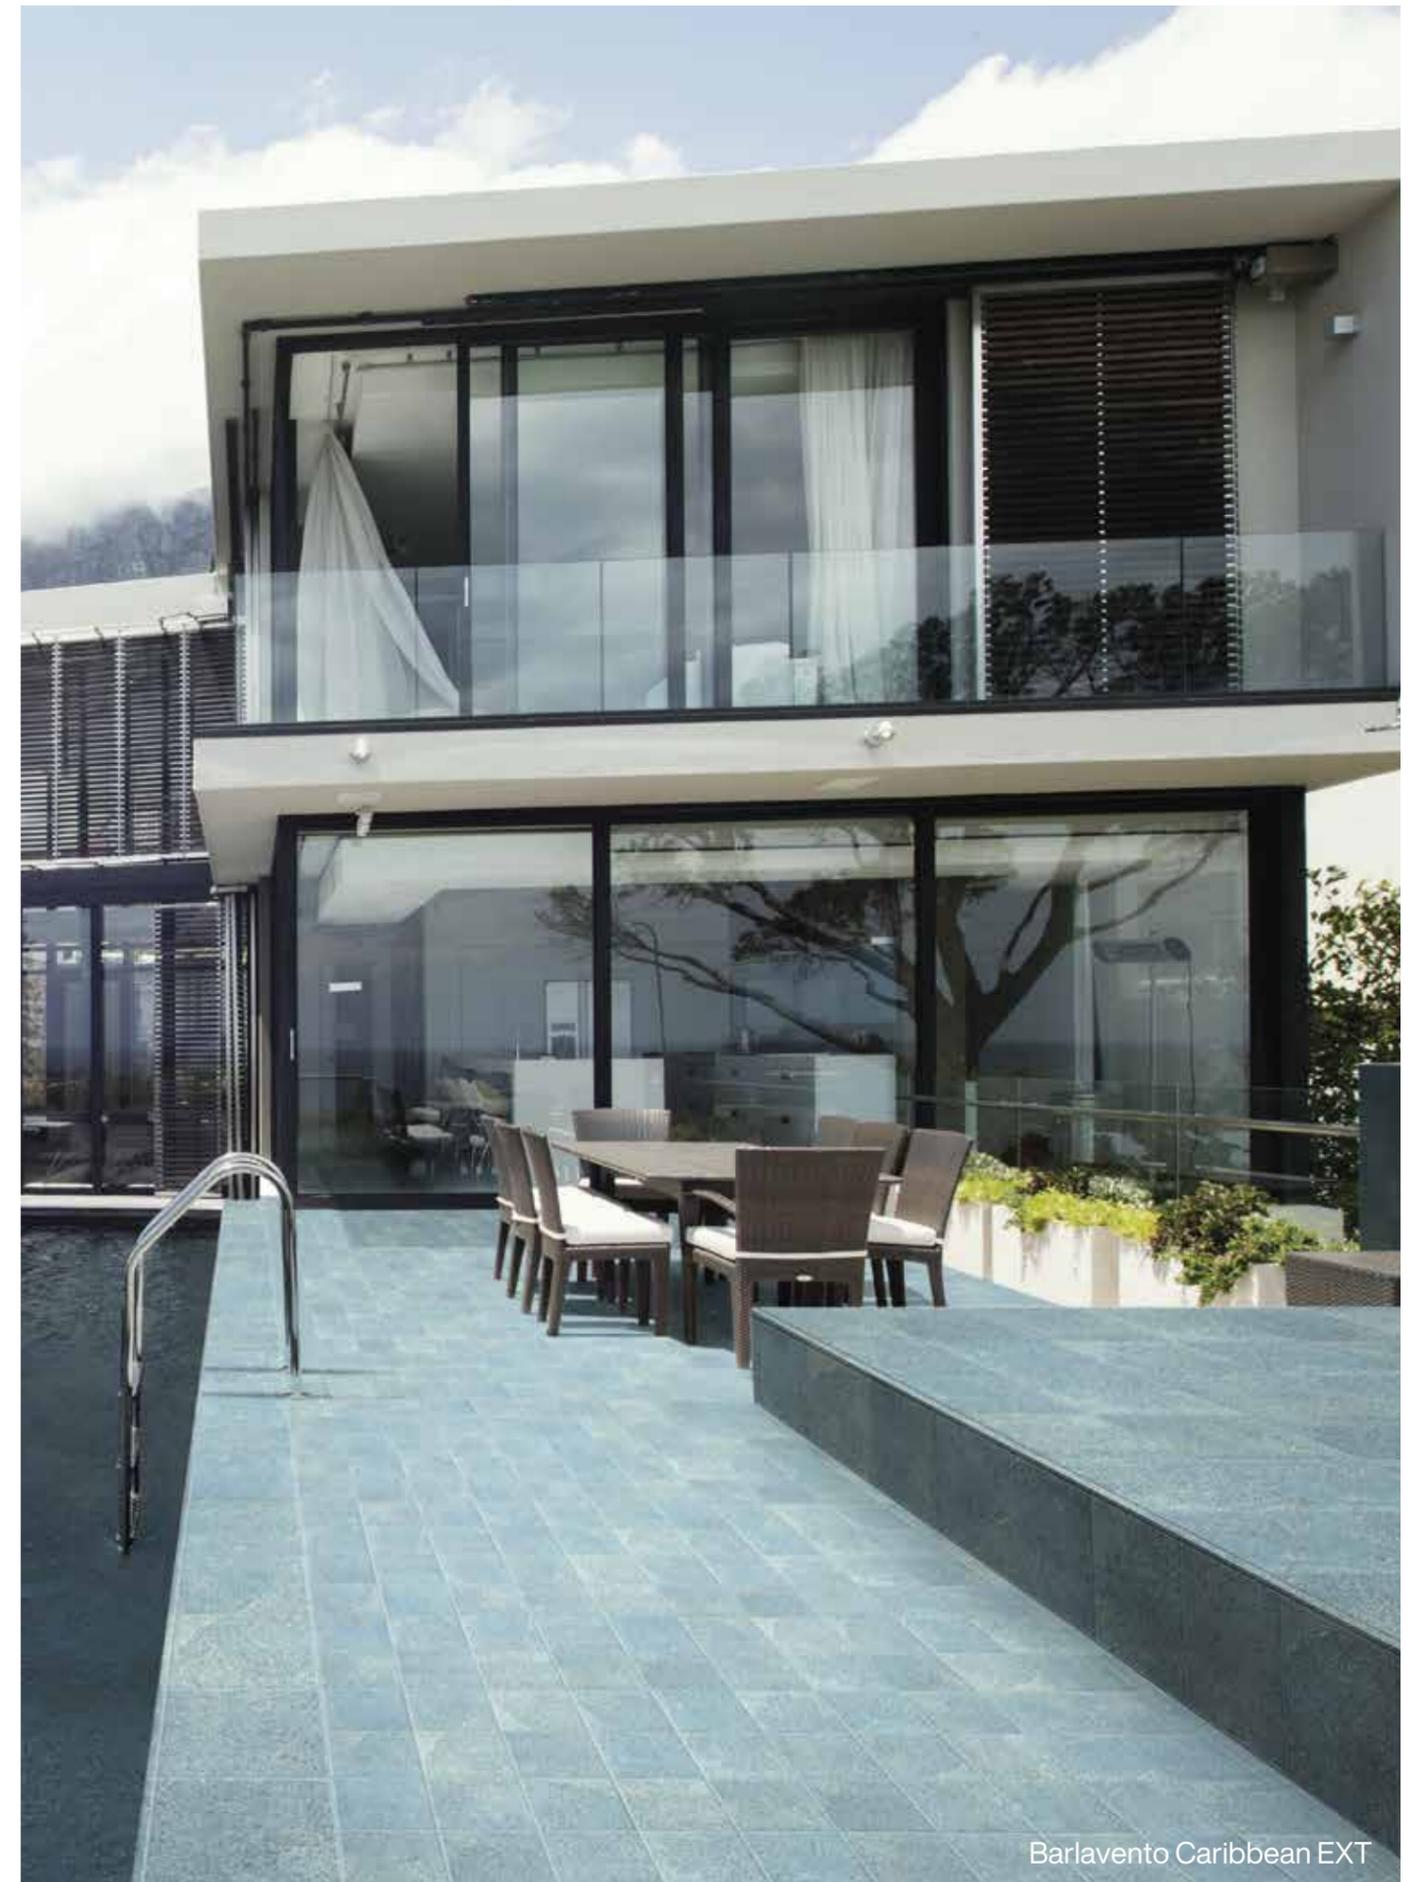

# Barlavento

Barlavento means windward in the nautical dictionary and is also the name of a group of islands in the Caribbean, with paradises such as Montserrat, Martinique and Barbados.

Atolls formed by coral reefs, volcanic rocks that rolled to the sea and small fossils mixed with sand, paint the Caribbean waters in refreshing shades of blue and green.

Inspired by the desire to have nature at home, Barlavento translates into tiles the exuberant beauty of the Caribbean islands.

The reproduction of stones in colors that replicate the shades of natural pools features versions for the interior of the pool, outdoor areas and solutions for finishing edges, steps and corners.

# Belgique

The Pierre Bleue or Blue Stone is a stone of the limestones category typical of Belgium.

This wonderful stone carries small fossils that stand out on its dark blue surface.

Belgique is a daring design through a merger between Blue Stone and concrete.

A material that does not exist in nature, which was created through design.

This new material expresses the contemporary plurality and was interpreted in three shades, darker bluish gray, Avalon, a lighter gray that also occurs in nature, and Clair, an elegant off-white!

The matte and external versions allow the continuous use of the same material inside and outside the house.

Belgique Décor is a graphic decoration in 90x90 format to customize both floors and walls.

Mosaics made from small slats of the material increase the possibilities of decoration of the line.

# Bloomy

Each house has its own perfume, freshness, color, and texture.

Bloomy represents the best feeling of being at home, when warmth flourishes, it emerges \*FROM\* the mix of choices that transform spaces into homes.

Neutral and welcoming in tones and surfaces, sophisticated and elaborate in details, surprising in the specific touches for each application, Bloomy is a system to wrap floors and walls in an atmosphere that invites you to stay.

The essence of the material is a fusion between the delicacy of marble and the contemporaneity of cement, which comes in glossy, satin, textured versions for external areas, in addition to the unusual weave of fabric carved on the surface.

# Folk

Celtic origin, raw material for other styles, activist personality and diversity mark the history of Folk, the rhythm that inspired Rock n' Roll.

Portobello Folk appropriates these elements for a rhythmic fusion that gives rise to a surprising surface.

Natural elements make up a recreated Limestone, a contemporary composition that brings back memories.

# Ipanema

An encounter of purposes has motivated the creative collaboration of Ipanema.

The new luxury, such as ethics aesthetics, full of environmental consciousness and expression of the authenticity that belongs to the one who creates it, was the initial dialogue turned into new surfaces in porcelain.

Ipanema, eternal inspiration. Ipanema through the creative vision of Oskar Metsavaht. From art to design, from landscapes to geometry.

A particular path built in chromatic compositions.

Black and white tones of the little Portuguese stones from the sidewalk translated into big surfaces.

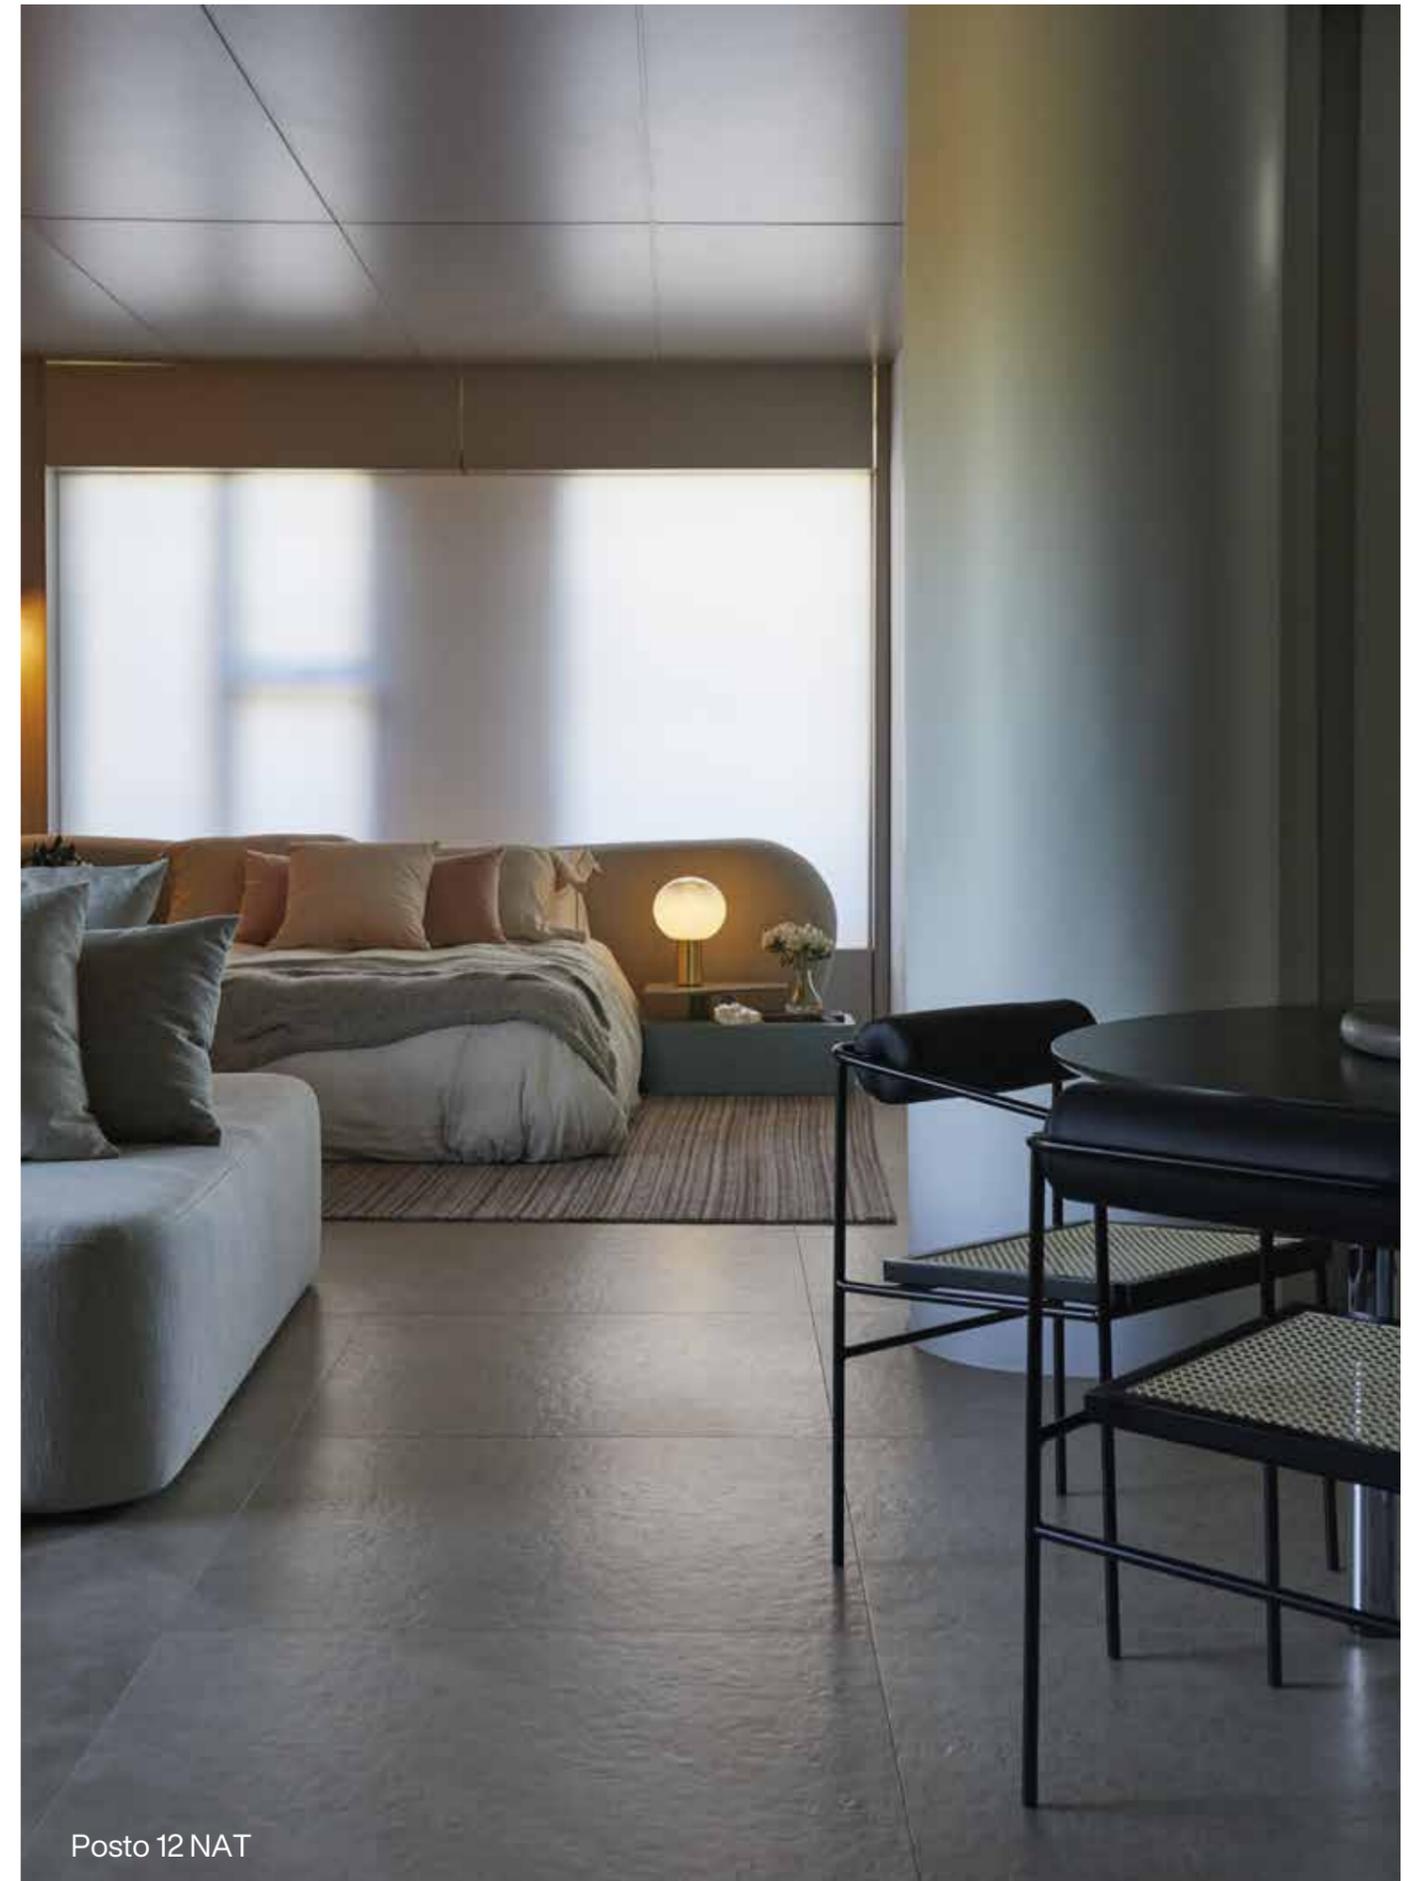

The square's sheer geometry or the mosaic's sinuosity, that changes the scale and amplifies the beauty of the famous sidewalks of Rio de Janeiro.

And the colorful palette reproduces Ipanema's natural light.

Sun, sea, sand.

Transformed into art and transported for the huge slabs.

A luxury. New, authentic and aware.

# Lalai

Own name. Beautiful to say.

The perfect raw tone, the fossil fragments in the ideal rhythm, Lalai is unique.

Imagination becomes matter.

The first time it was stone, the second time, more serene, just the essence.

The beauty that exists. It simply exists. Nothing more.

Lalai is French by origin, with tropical charm and created for the world.

The new matter. Don't be surprised by desire at first sight.

# Malibu

The diversity of multicolored rocks is due to the dynamics of billions of years under varied tectonic movements, making the region a barn of slates and sandstones.

Malibu interprets the regions coastal atmosphere in reproductions of slates, which are rocks formed in layers of quartz for outdoor and recreational areas.

California's unique natural light inspired the billboard with sea and soil tones in formats for balconies, walls, edges and pool interiors.

Malibu translates a way of being, a way of integrating architecture and nature.

## Ms. Barcelona

Mies van der Rohe, in addition to being one of the leading names of twentieth-century architecture in translating, in a daring, sophisticated and very innovative way, his minimalist austerity, also left some maxims such as "Less is More."

The "less is more" may seem simplistic, but it is actually quite sophisticated and elaborate, it is the synthesis of simplicity from quite complex compositions.

One of his main works, the German Pavilion made for the world fair of Barcelona, is recognized by the fusion of diverse materials and architectural elements that express in a unique way the "less is more".

Ms Barcelona was idealized with the ambition to translate the same thought into a design proposal that, from a fusion of materials like limestones, cements and basaltins, creates a striking but minimalist surface that may use veins and elements of natural stones or cement textures with aggregates, in a chromatic balance that converges to something unique and synthetic.

# Oasi

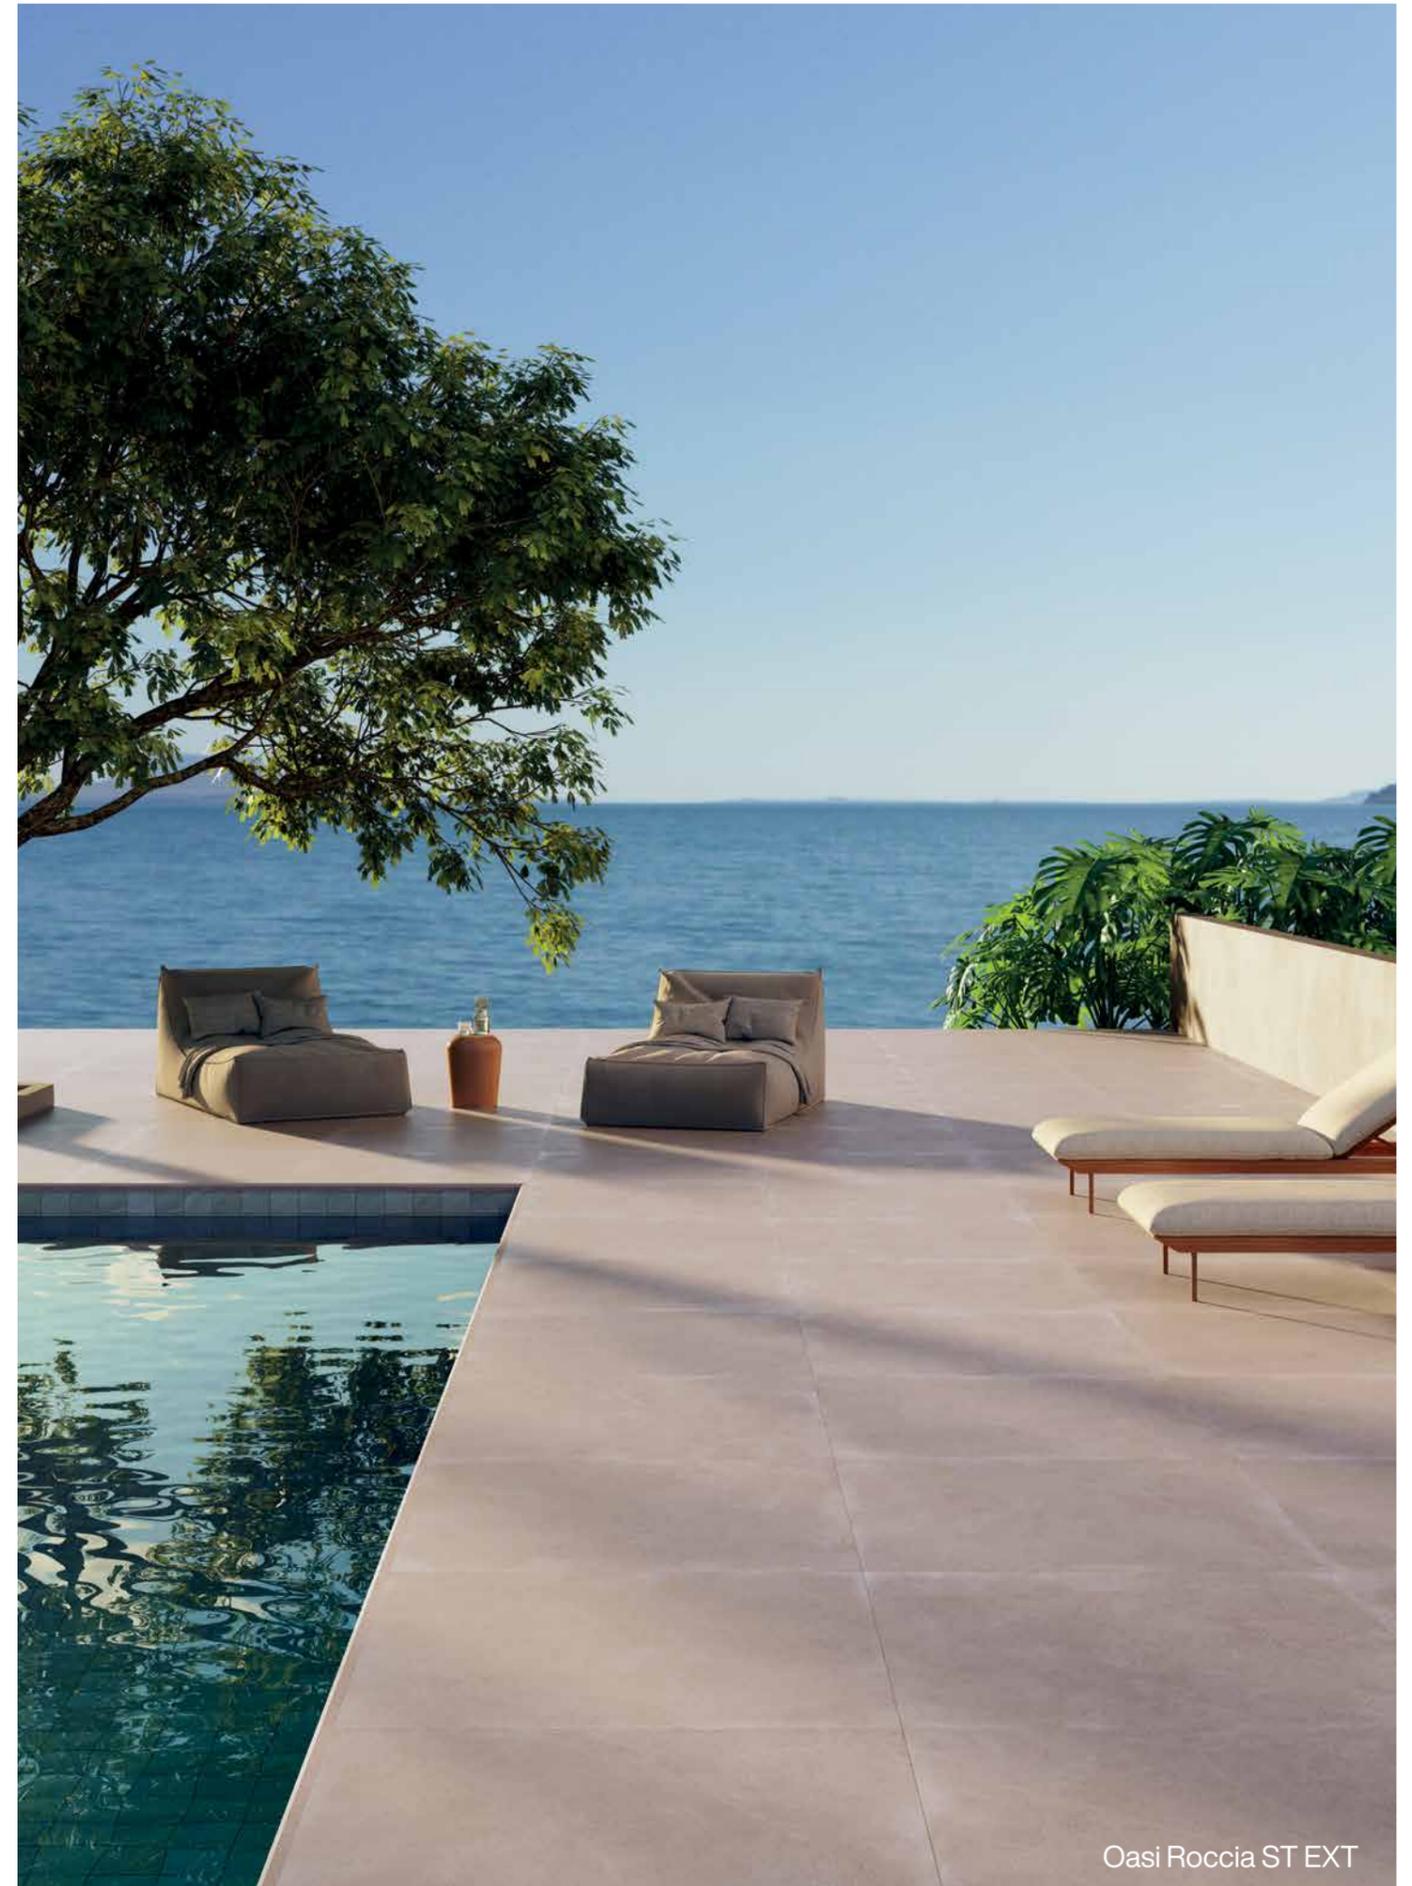

In the heart of a concrete jungle, our home.

For the disquiet of urban life, Oasi.

Its calm and charming atmosphere redefines our personal refuge and transforms our home into a sanctuary of protection and comfort.

From textures that invite touch to the incorporation of technology in the most subtle features, each detail creates the perfect sensation of serenity with a line that embraces areas throughout the home.

Combining levity and bright edges with an illuminating palette of three colors for different sizes, Oasi offers a new look at the spaces that we call home.

# Pietra Lombarda

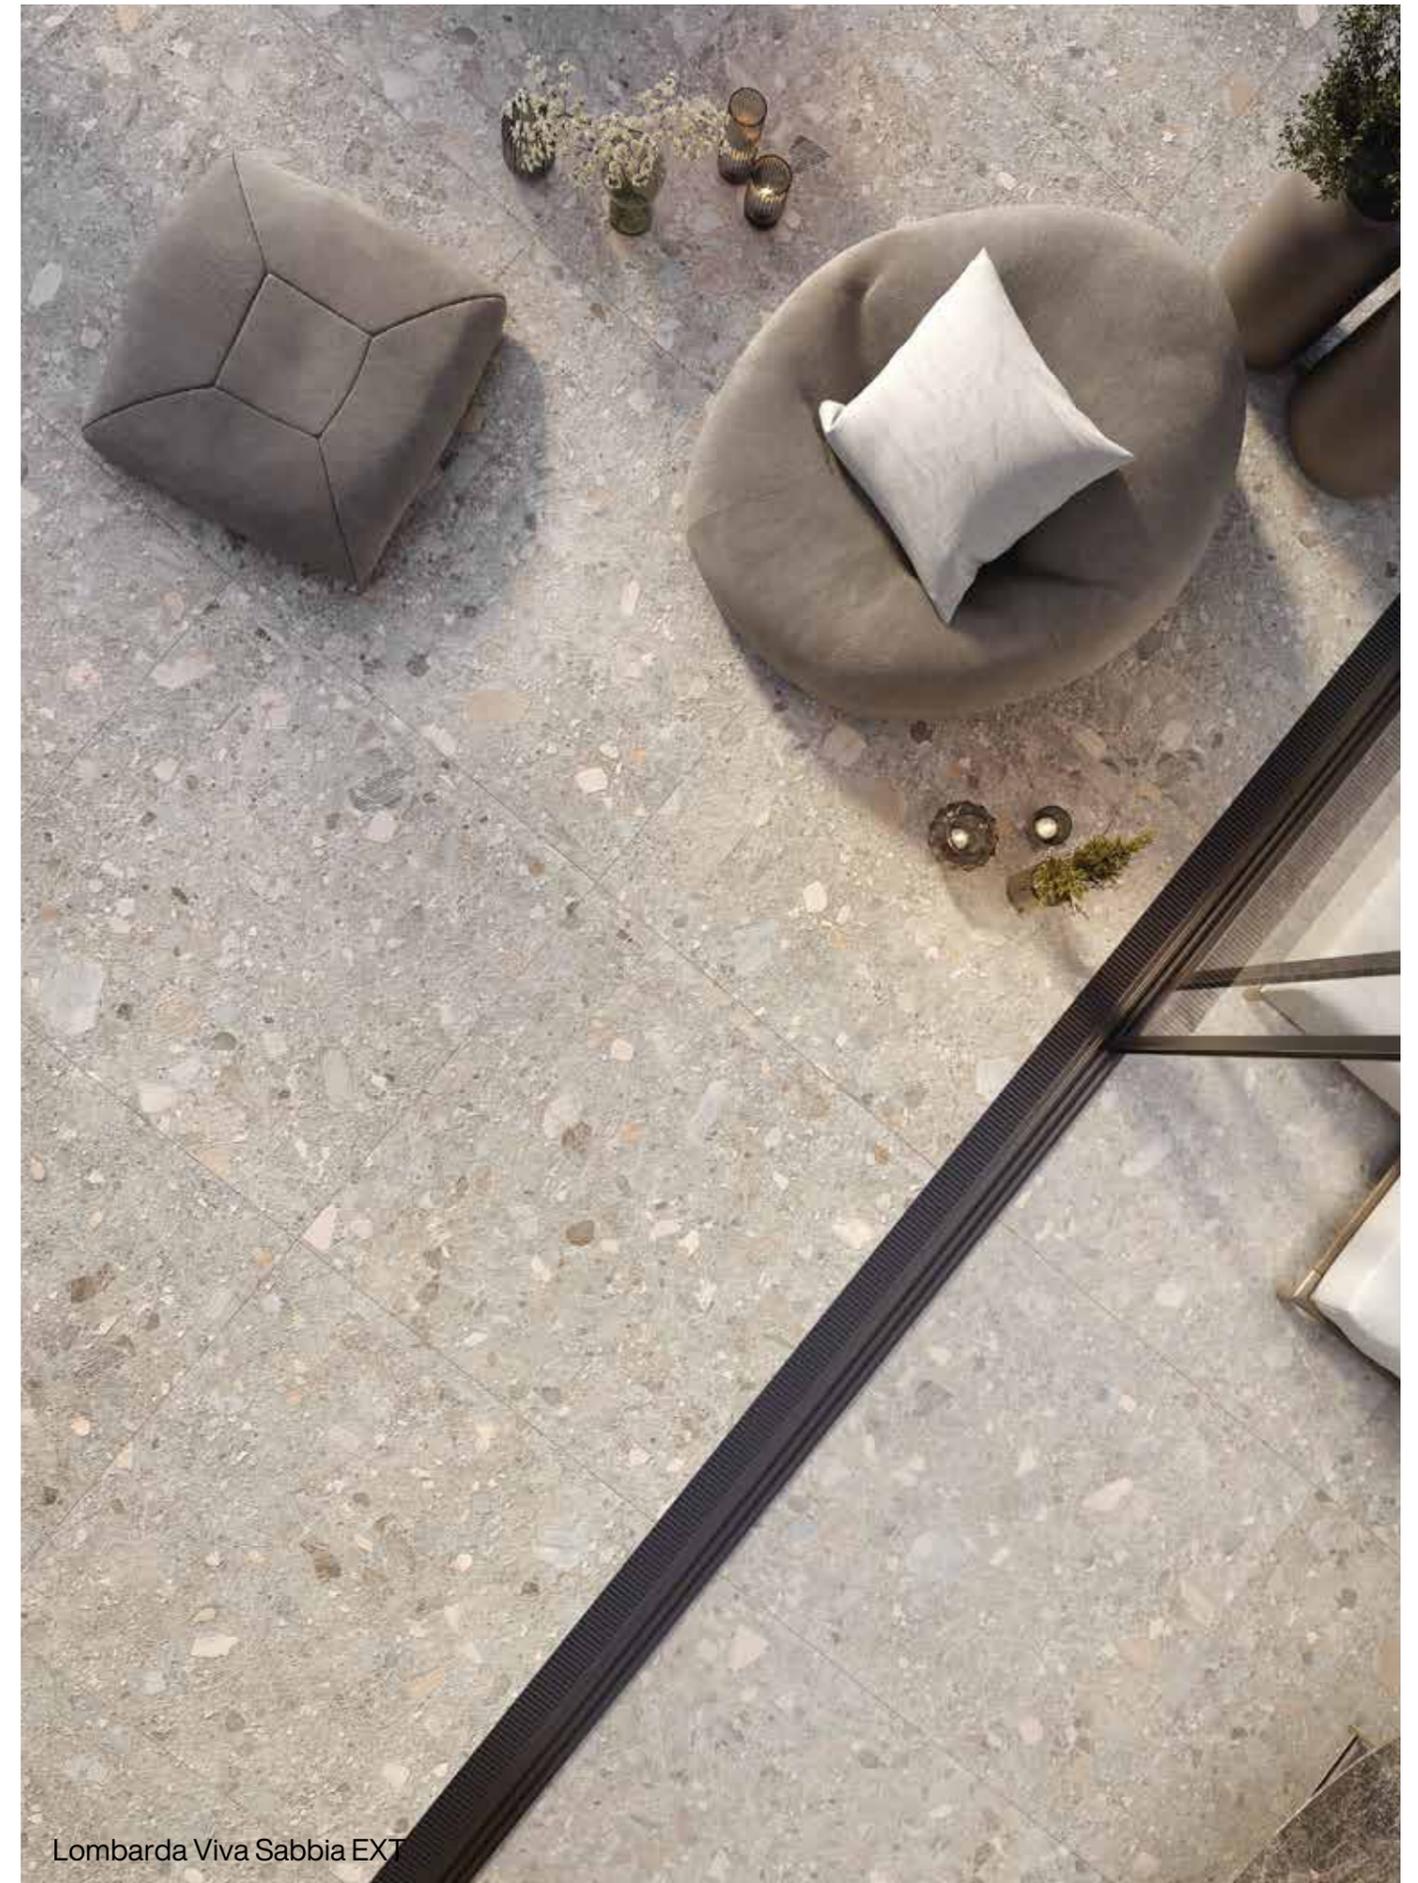

It is a gray stone with chunks of other rocks in its composition.

The name "ceppo" in the Milanese dialect means "stone with pebbles" and originated the Ceppo di Gré.

Known as the rock of Lombard architecture, the blocks were brought to town across the river Adda to the Naviglio in Milan to supply the great works of the city.

Elegance and personality cover the surfaces of Pietra Lombarda, which was interpreted in three natural tones.

It's amazing how nature made large multi-shade pebbles to create the Pietra Lombarda, a unique material that combines sobriety with a bold and a contemporary spirit, a material that strongly expresses Milanese aesthetics.

# Samba Rock

A methodology that transforms dialogue into design.

When meeting with Marcelo Rosenbaum, the material reveals its own rhythm.

Samba Rock pays homage to its roots, while at the same time absorbs the new.

Two creative teams, two distinct cultures, two vibrant rhythms that harmonize in the form of terrazzo, a material that knows no boundaries.

A surface that beats with the nobility of Brazilian stones - soapstone, galapagos, paran - but reveals a multicultural identity.

In large sizes or in 20x20 options, terrazzo comes to life in off-white, graphite and green, creating mosaics and new possibilities each time you look.

Digital relief technology makes the stone emerge in a dance of textures that invites touch.

## V Stone

Fossils and marine sediments characterize traditional limestone.

V Stone rescues this millennial material with a timeless French aesthetic quality and mood.

One of the main squares in Paris, Place Vendôme, combines tradition and contemporaneity, and was the conceptual inspiration for this innovative project.

The warm tones of this limestone in addition with a Super Touch surface technology reveal high and low reliefs throughout the piece, highlighting the elements that make up this limestone.

# Verano

The most awaited season of the year: Verano!

The season where the days are longer, and the nights are shorter.

The season to intensely live and enjoy outdoors.

Verano provides an atmosphere that vibrates freshness and a relaxed soul.

A stone with a variation of designs and fresh nuances.

It can always be summer!

With Verano we translate the climate and light of this season for every single day.

Indicated for outdoors – for swimming pools – the surface has its shades accentuated with the effect of water and sunlight.

In 15 x 15 cm (5.91 x 5.91 inches) format, it also suits indoors areas for more relaxed projects, beyond imagination.

# Zesty

Essential and bold, the fusion of limestone and marble becomes the art and craft of the ceramist when creating a new material.

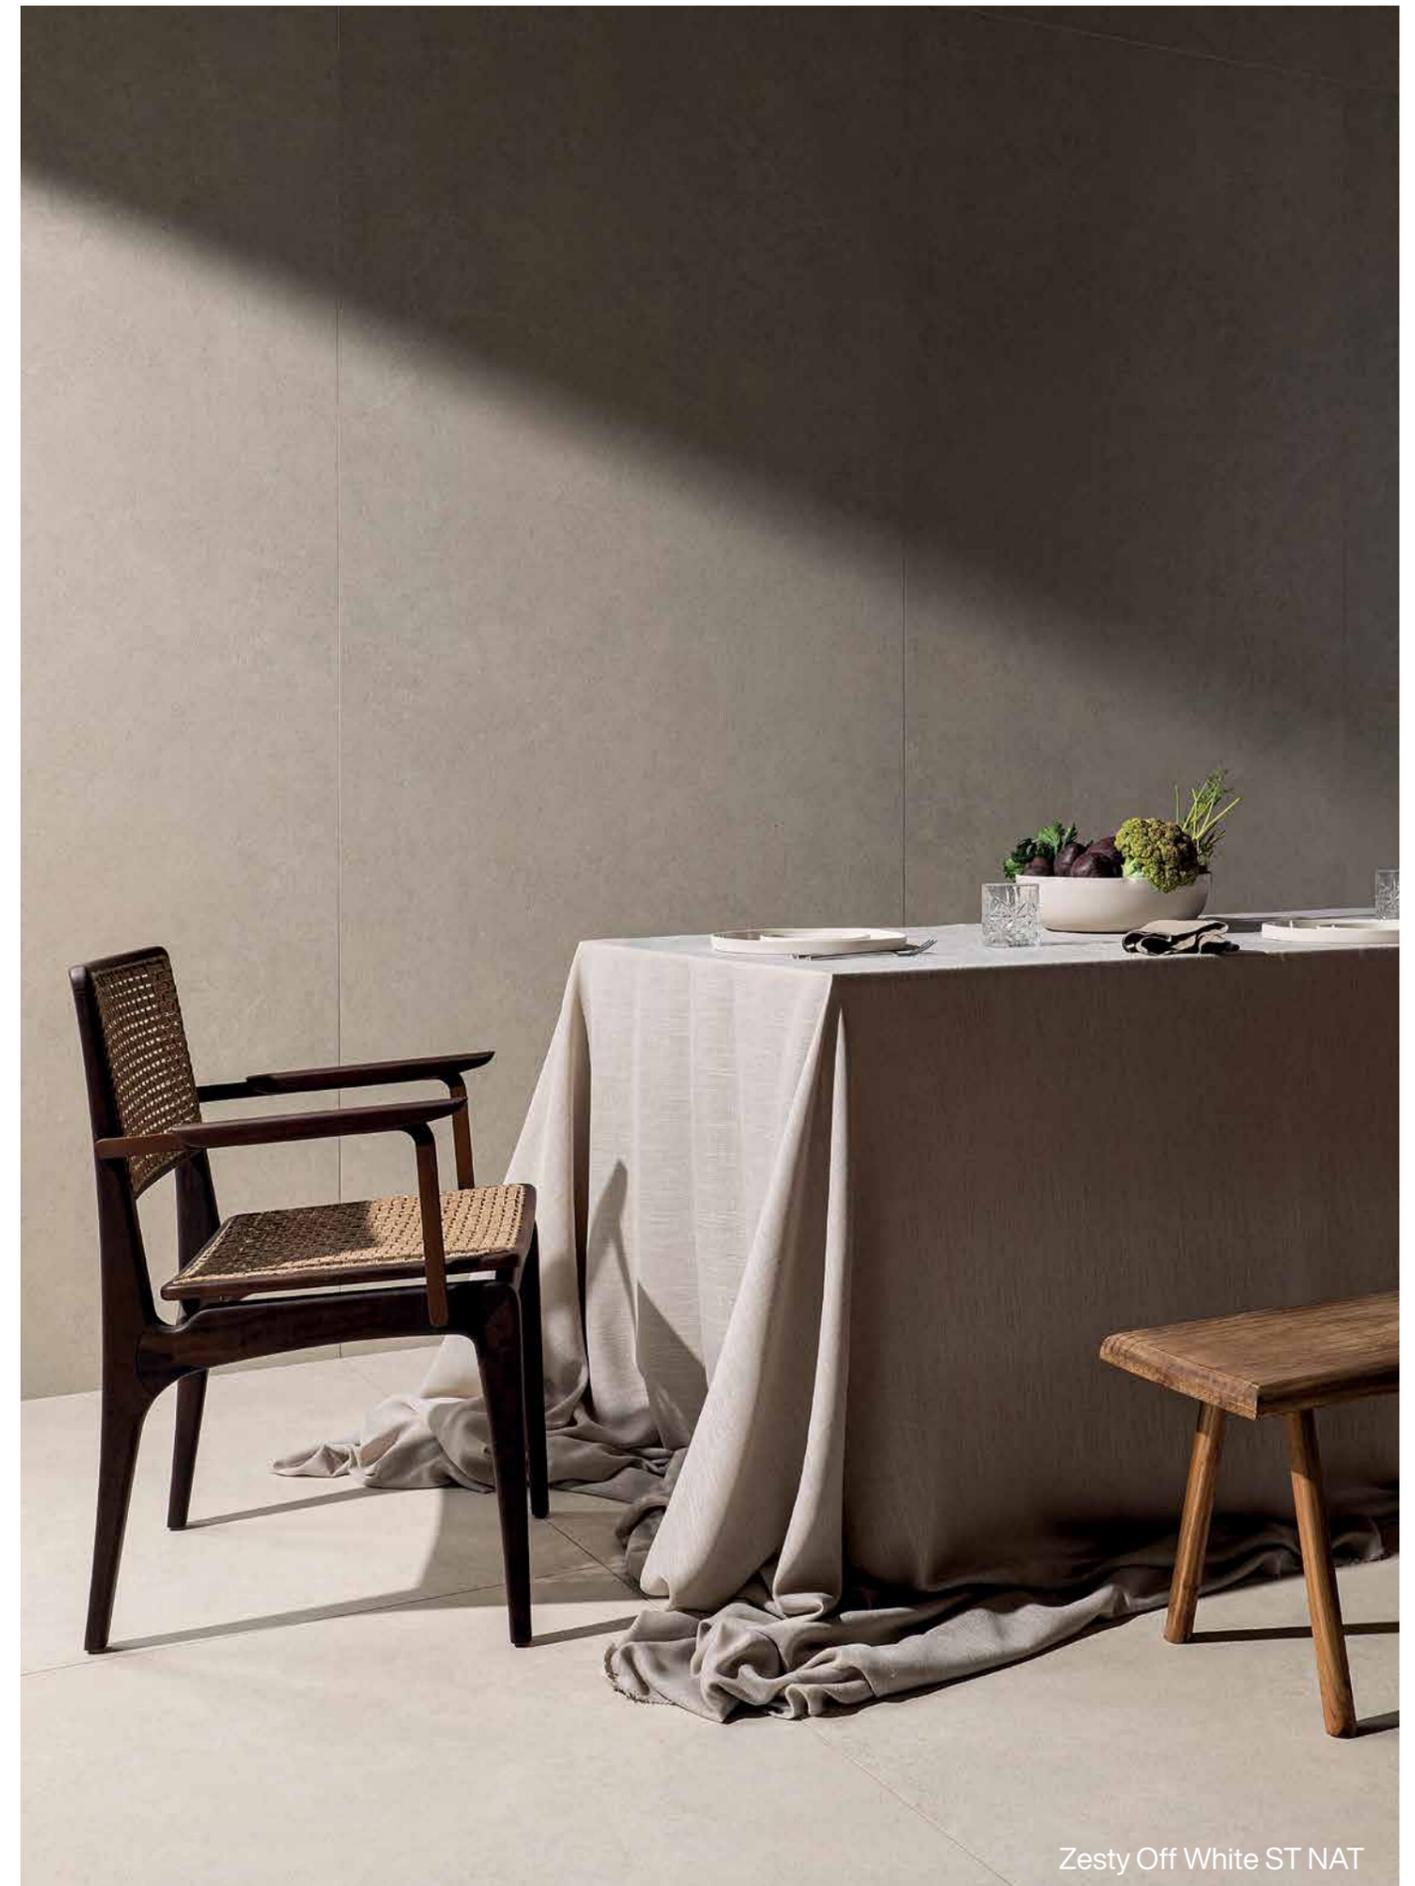

The strength and intensity of natural stone immersed in the subtlety of ceramics are not unintentional, they are the precise exercise of design and boldness in search of ideal balance.

Zesty reveals itself to be unique, original, tailor-made to be recognized, without overlapping the project's identity.

It is a proposal to cover all of the rooms in the house, with surface-sculpted textures, whether in the natural version or for outdoor areas.

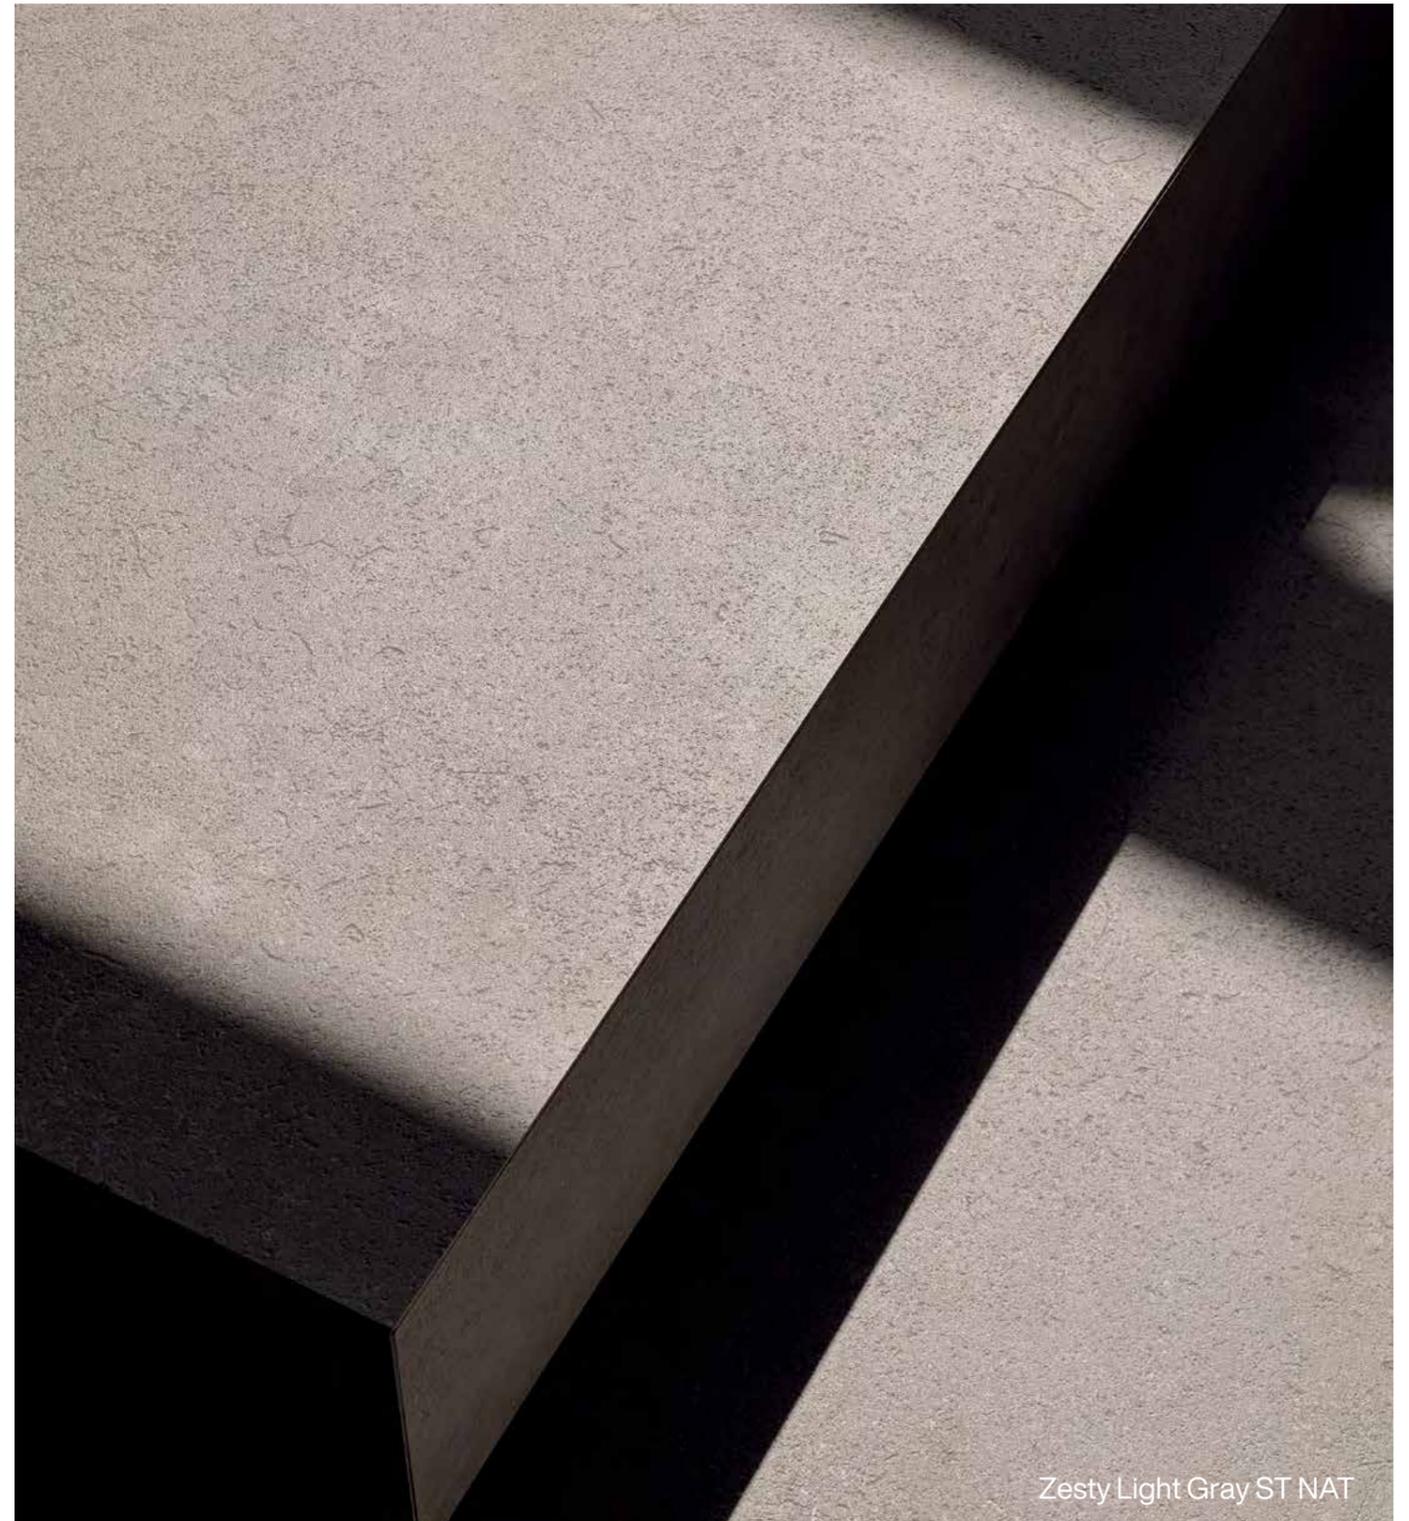

Available in Off White and Light Gray.

It is a proposal that crosses time, saves memories and, silently, reveals its sophistication.

# Artematica

The art of geometry and its exact beauty.

Subject of study in mathematics, geometry deals with pure shapes and their attributes.

Artematica brings together the strength of orthogonal embossment and the expression of a unique range of colors.

A cool and timeless fusion.

# Artifact

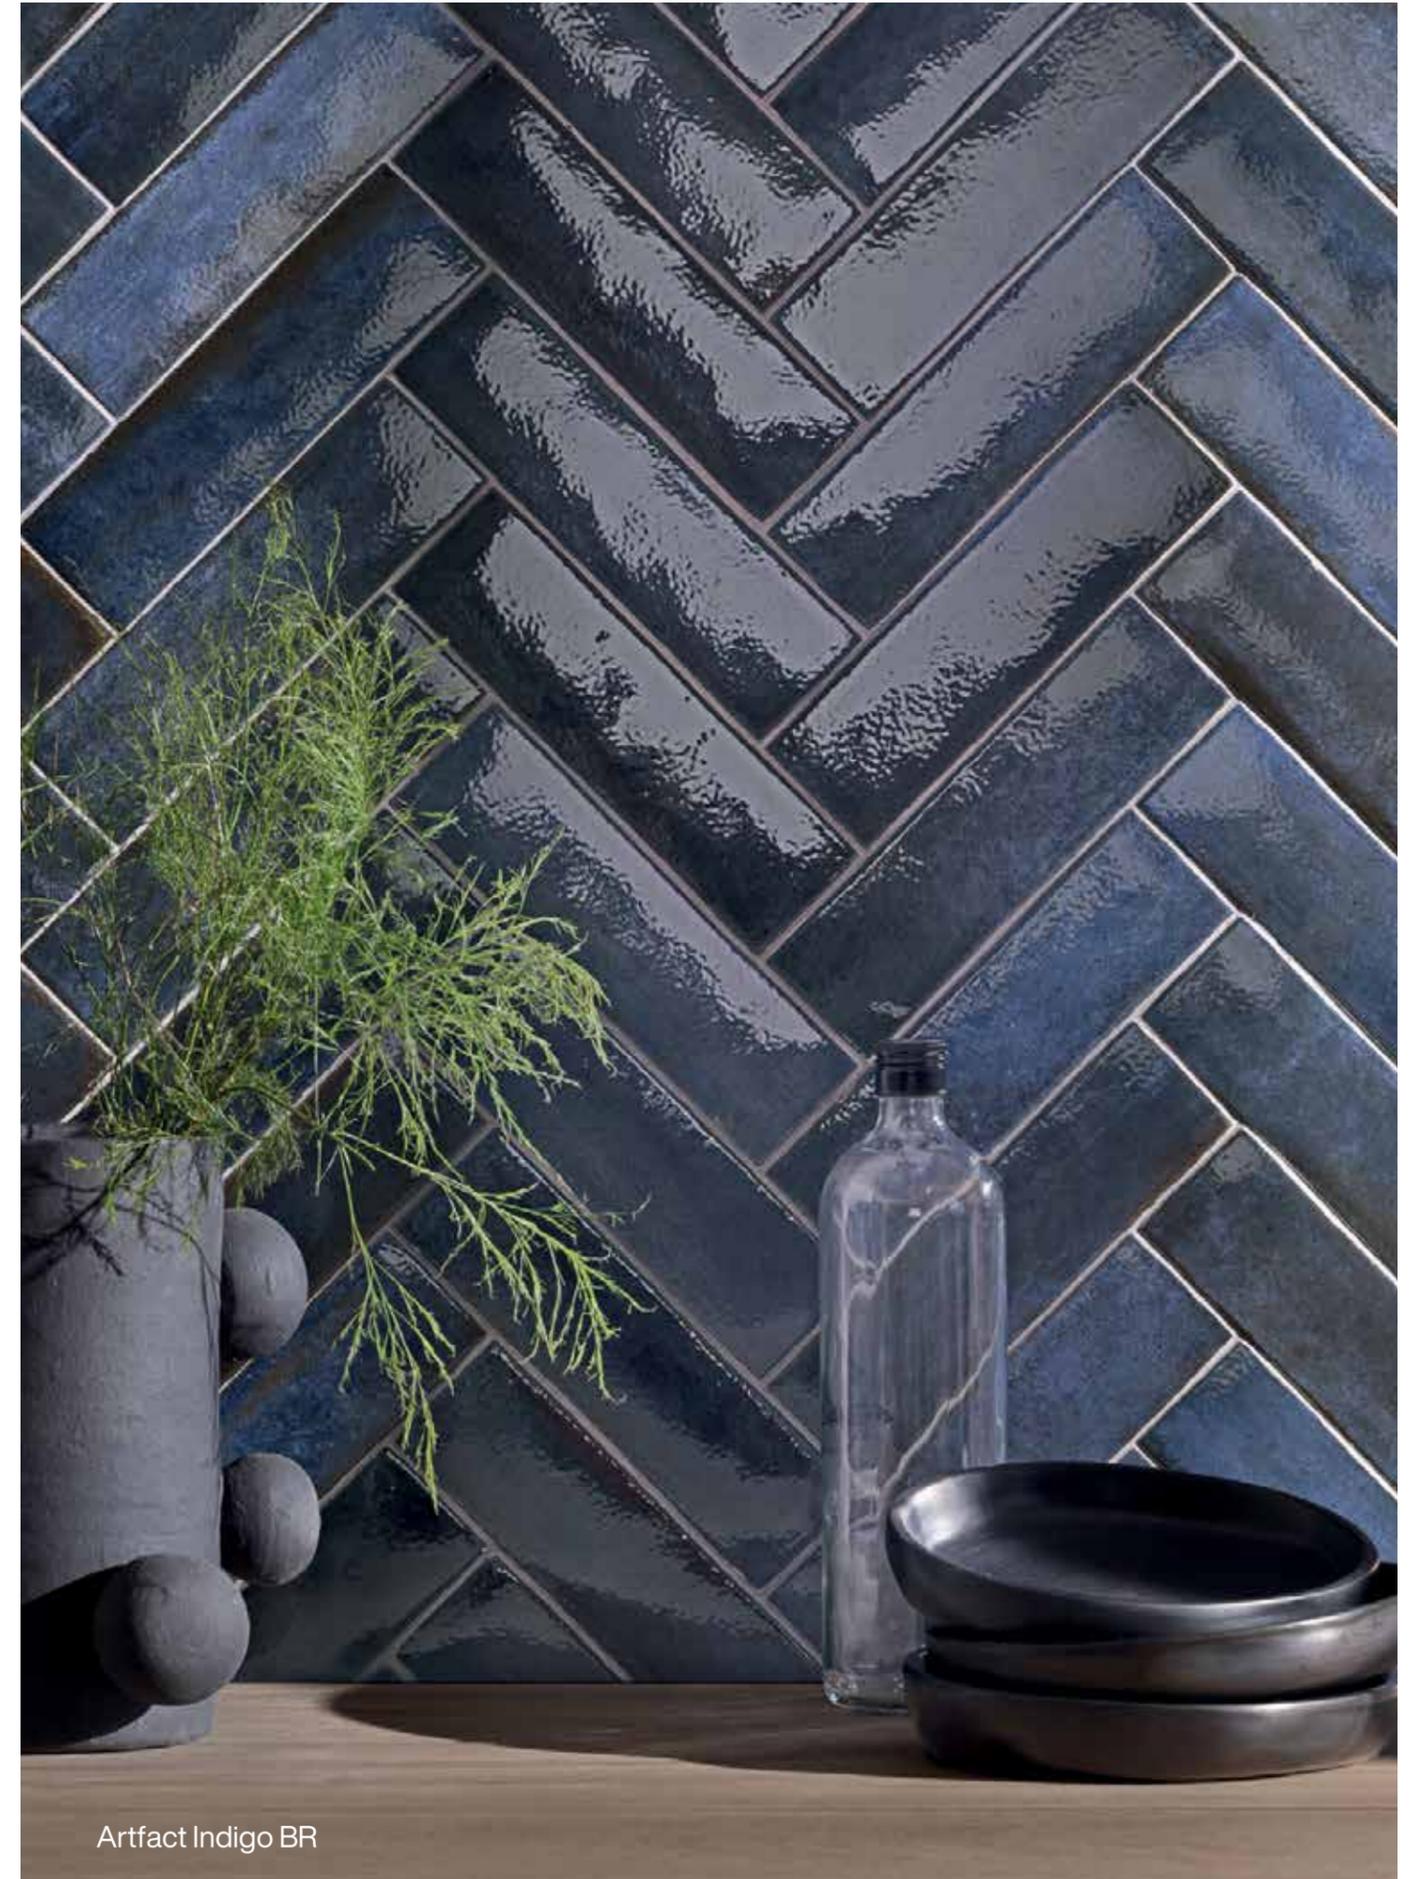

Intentional objects. Objects that tell a story and reveal their origin.

The idea of being hand crafted, of imperfection, forged by fire and natural forest tones, was translated into material and technique.

Industrial surfaces to be coated with strength and meaning.

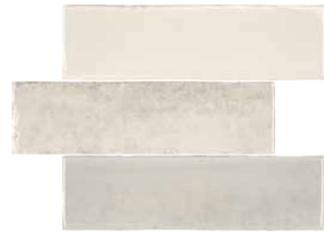

Surfaces to express the randomness of shape, the unprecedented, which make ceramics as beautiful as they are unique.

Artifact immortalizes the artisan's discoveries in a collection of elongated, thickened coatings, with organic edges and different chromatic color intensities.

# Haptic

Our desire to innovate through collaboration and our admiration for contemporary art inevitably led us to Vik Muniz.

We find in this dialogue a broad space for experimentation.

His personality - restless and expansive - sparked debates beyond the material and influenced reflections on behavior, art, and design.

Vik demonstrates in his work an interest in discussing the true meaning and value of objects. His works invite us to understand the part before the whole, or the whole before the part.

Small diamonds form celebrities. Confetti brings historical figures to life. Shredded – and useless-money gains new value by recreating elements of nature.

Vik lends this same creative eye to ceramics and creates a new texture that surprises both eyes and hands.

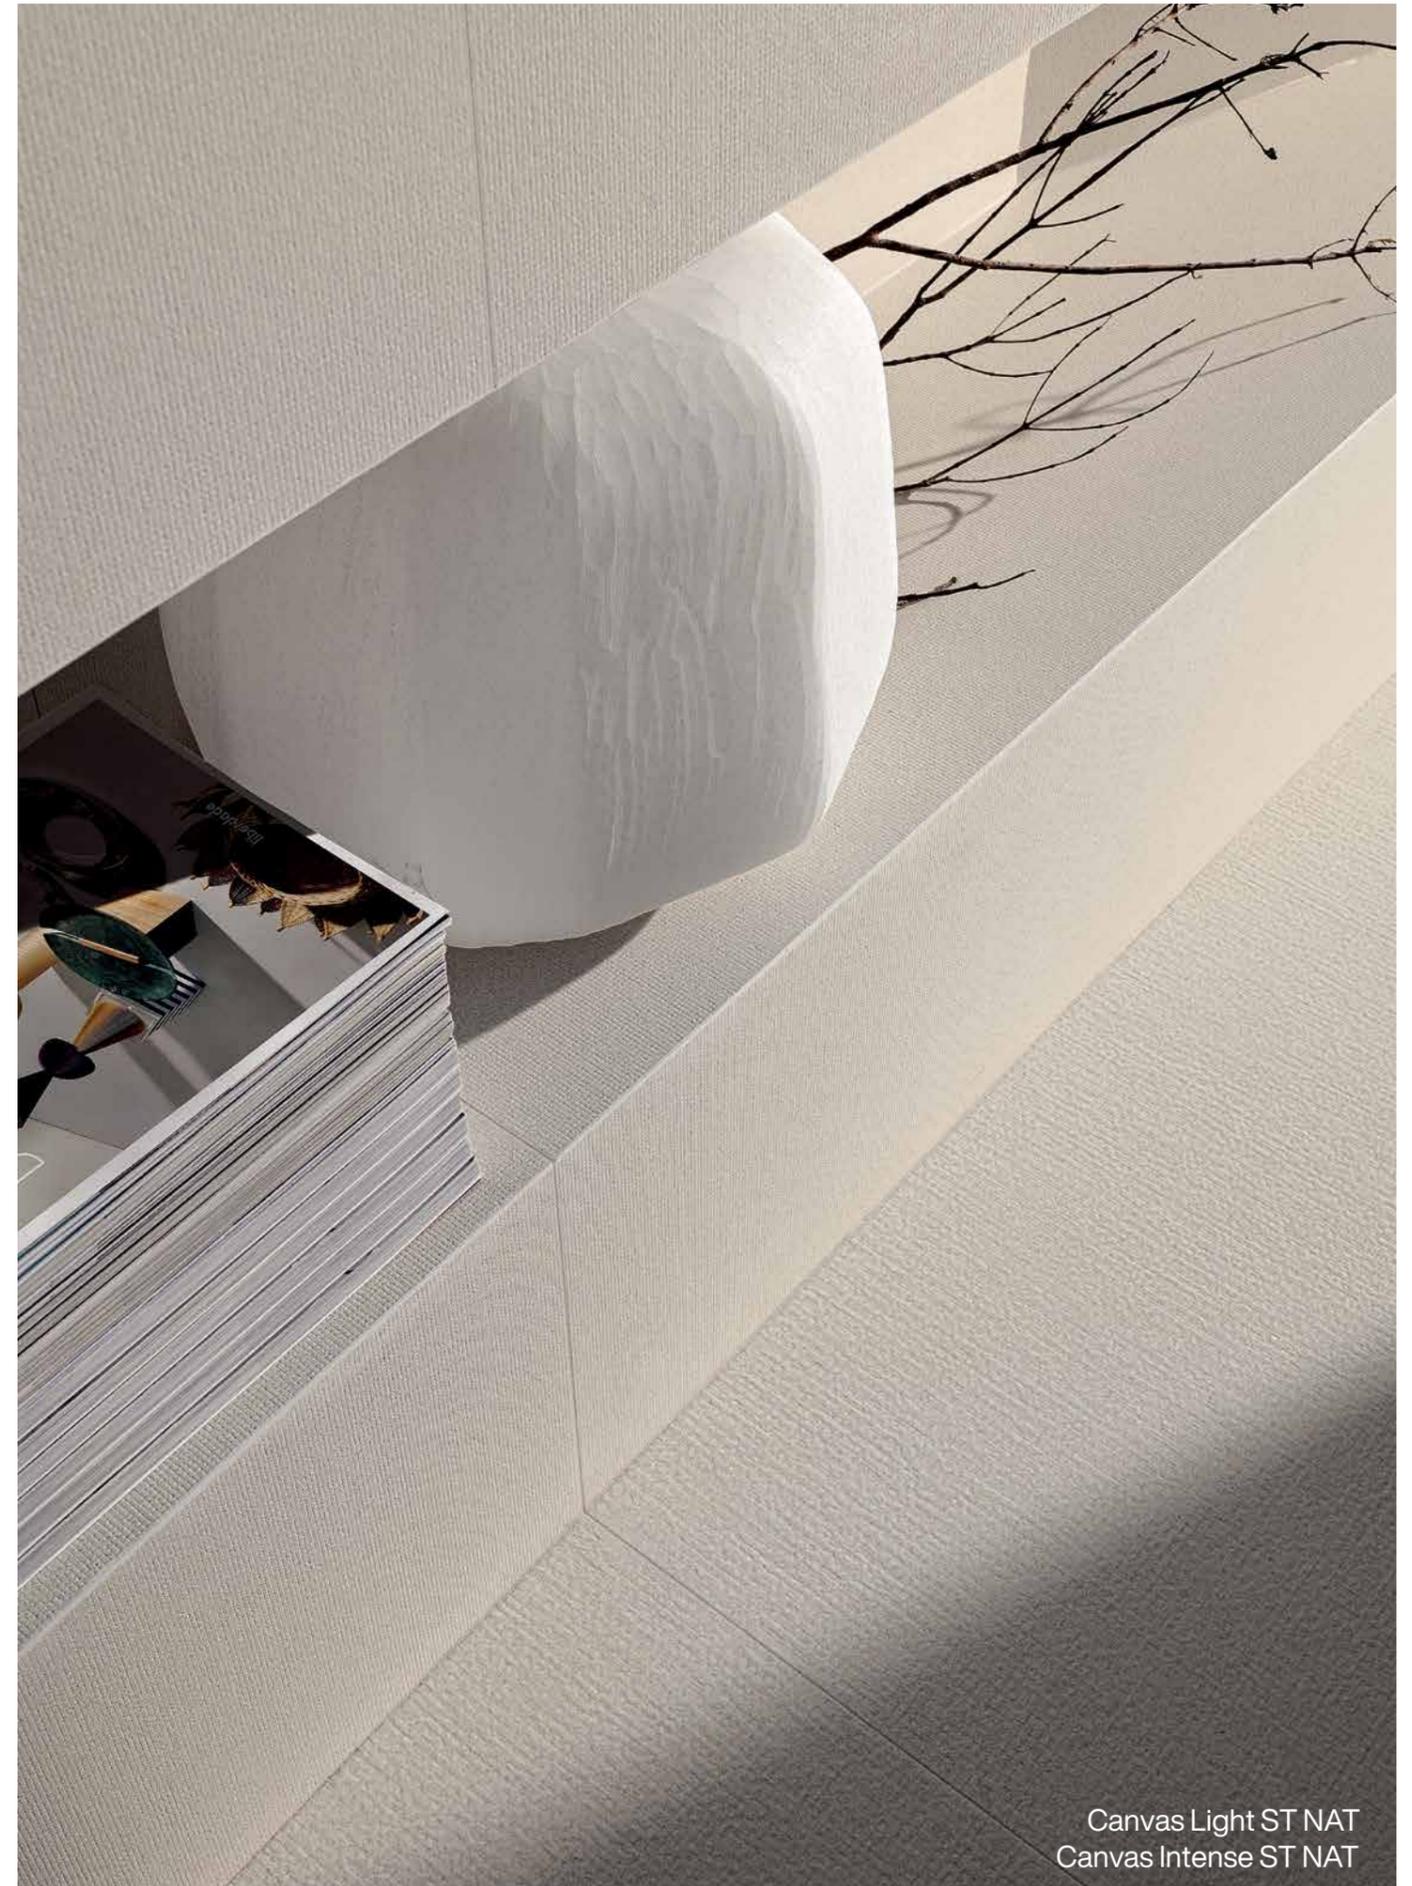

The paper was the starting point. The porcelain, the means of expression.

During the process, he skillfully guided us to extract from the ceramics the same textures, micro-reliefs, designs, and colors that very much attracted him to the paper.

An ancient material that seduces artists with its meaning and possibilities.

Thus, Haptic is born, a collection that explores the different characteristics of paper and the subtle nuances of watercolor.

Canvas reveres large formats, highlighting the different weights of the paper, always in search of a neutral surface.

# Highlands

An aquarelle-inspired surface with toned-down nuances, inspired by the Great Lakes region in the South and the Tennessee area.

It is reproduced in artisanal ceramics with fluid reliefs.

The color palette interprets the four seasons of the American landscape, ranging from cool tones to warm tones, mirroring the transition from winter to summer.

Highlands is a customization element that traverses the walls of the entire house, both in balconies and in gourmet spaces, living rooms, powder rooms, and bathrooms.

# Horizontes

Traveling is much more than getting from one place to another.

The real art of exploring the world is not attached to a plane ticket but to the burning desire to understand other points of view, accept what seems different, absorb new realities, look within ourselves, satisfy our curiosity, and expand horizons.

After visiting more than 60 countries, the journalist and architect enthusiast, Pedro Andrade shares some of his physical and emotional adventures with us.

Through a collection inspired by the colors, textures, landscapes, flavors, and peoples from five different cities, he goes back to these places, however, this time by our side.

# Liverpool

The history of rectangular wall tiles for wall coverings was employed even in the 19th century in The Tube, the name of the underground (subway) in London - that was the inspiration for the Liverpool line, a very contemporary reinterpretation of that material.

There are basic and neutral colors in color options on a glossy surface with subtle embossments to \*UPDATE\* the original version of the wall covering in one of the first London underground (subway) stations, Liverpool.

# Puraforma

A timeless encounter of monochromatic tones, where versatility is the dominant note and the reliefs are the true protagonists.

With long, tapered lines, they connect with all spaces. In a matte finish, the textures awaken a smooth and sophisticated dynamism.

And the incessant movement, provides amplitudes like true visual decorative choreography.

Puraforma is creative rhyme, it is an encounter of possibilities.

An authentic expression of a beautiful aesthetic with technical and formal accuracy.

In the 10x20 size, Supreme presents colors that stand out with a mix of reliefs and emphasize the effect of light and shadow.

New possibilities for environments full of personality.

# Scuba

A "deep dive" into the ceramics process reveals new colors and possibilities.

A learning experience that brings together the spontaneity of handcrafting and the precision of porcelain.

The combination of glossy areas and matte surfaces creates a visual texture with remarkable color depth.

Available in five vibrant shades and one neutral option, Scuba enables multiple customization possibilities.

Scuba is a sensory experience – the touch of craftsmanship with a contemporary vision, transforming spaces into immersive experiences.

# Sunset

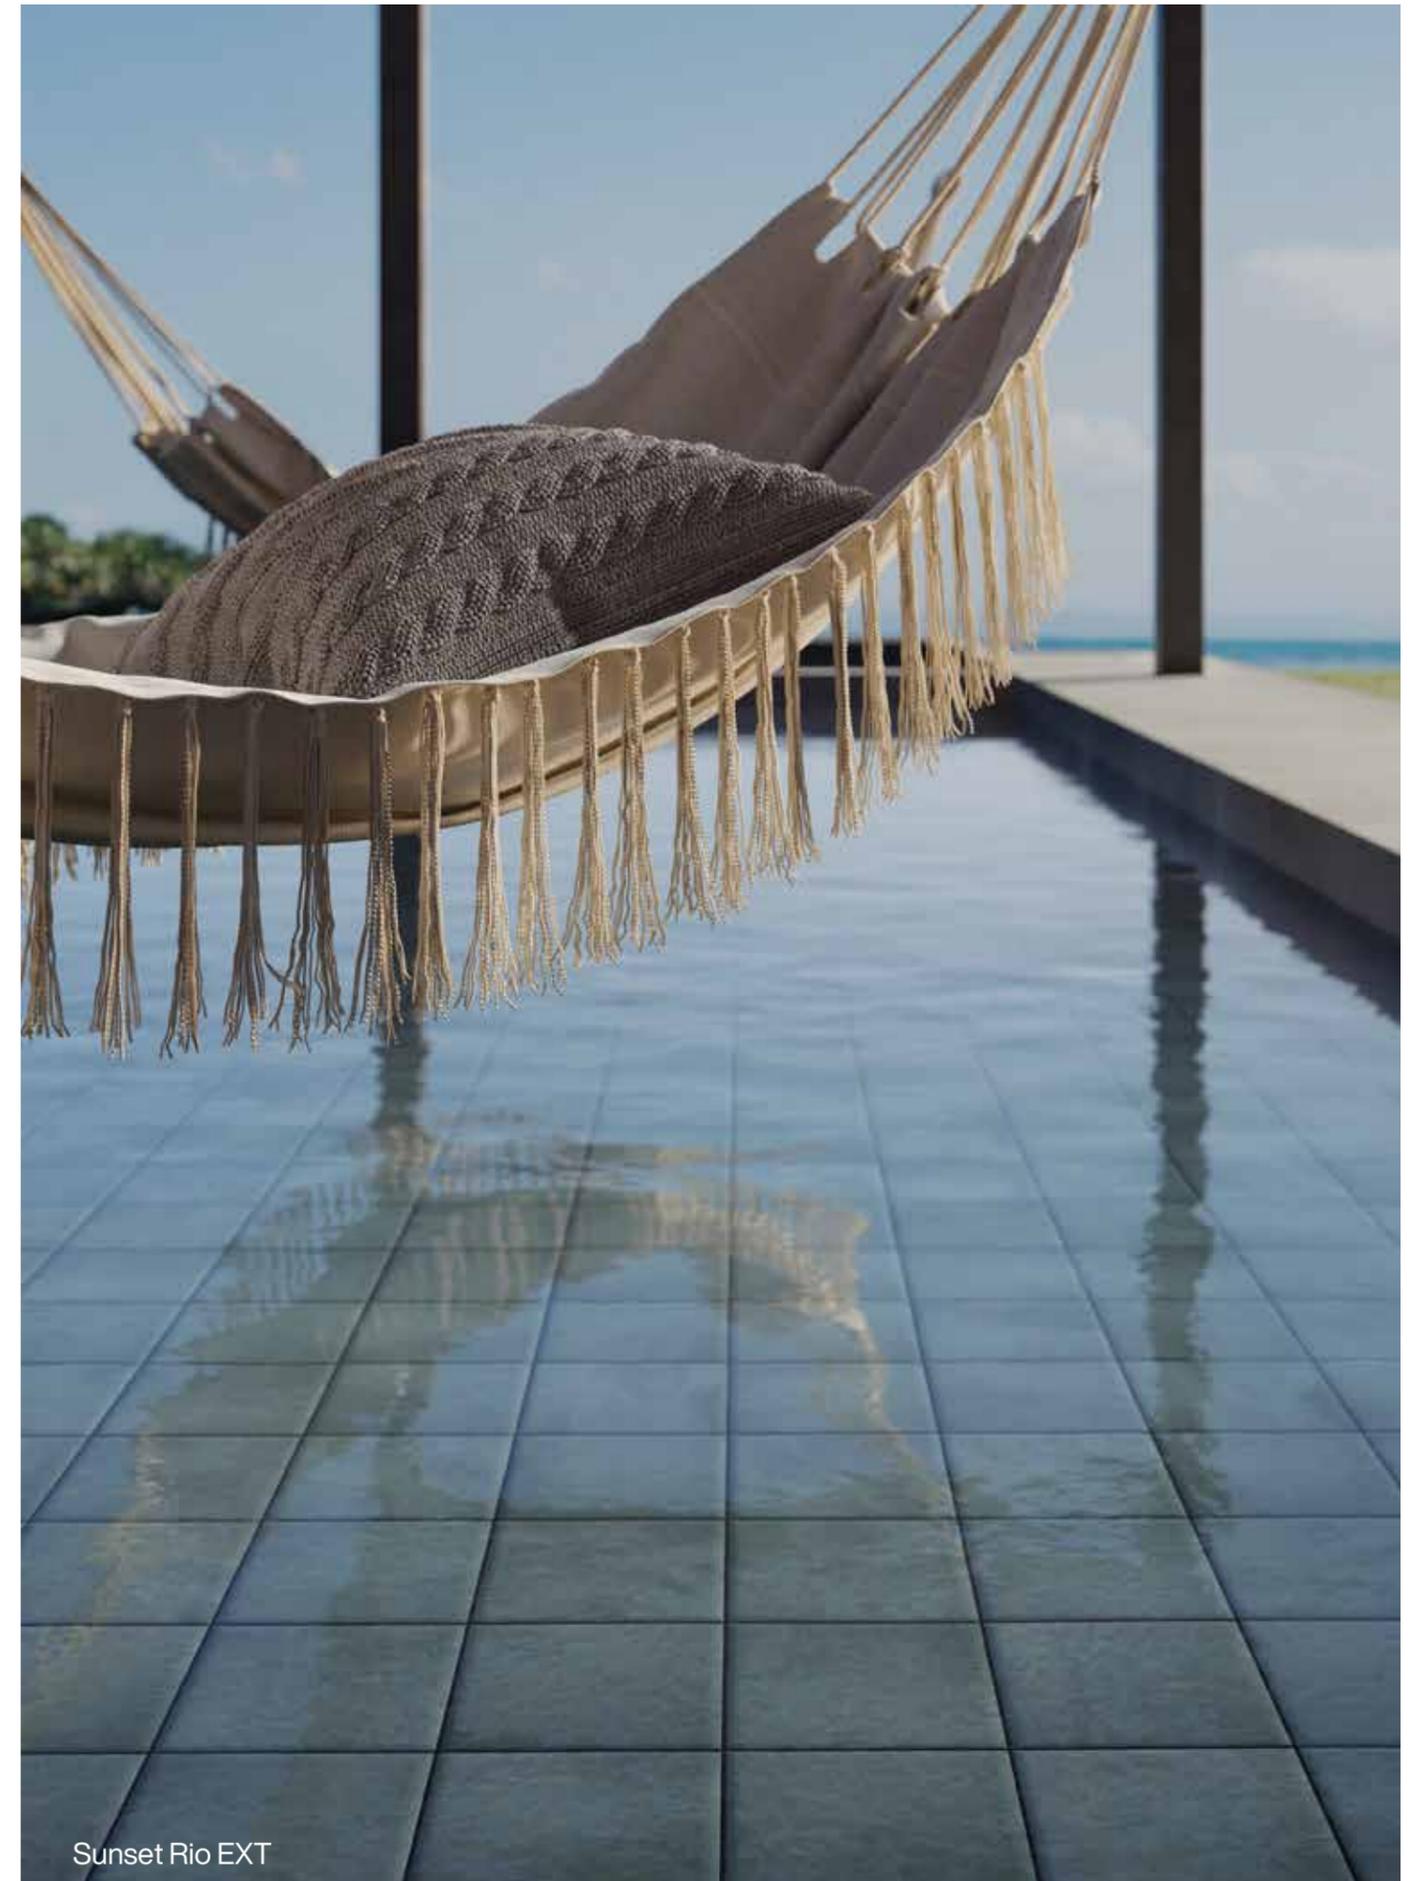

The sun presents itself in a unique way in different destinations around the world, providing a fascinating natural spectacle that never repeats itself.

The particular atmosphere of the sunset inspired us to idealize scenarios and environments for leisure time.

Sunset features a surface specially developed for application in swimming pools.

The motion of the design and the variation in the product's tonality stand out against the water to reveal a surprising effect.

The five colors available in the 14.5x14.5 format wander through shades of green and blue and provide a refreshing mood in perfect balance with nature.

# Surfaces

Color system and formats for architectural surfaces.

The redesign of small formats brings essential features to the architecture of our time.

Two squares and two rectangles with 25 different colors especially designed for large plans, such as facades, internal panels and pools.

To enhance the colors, the edges got straighter, minimizing shadows caused by the bold edge. The finishing is super matt, decreasing the reflection which distorts the colors.

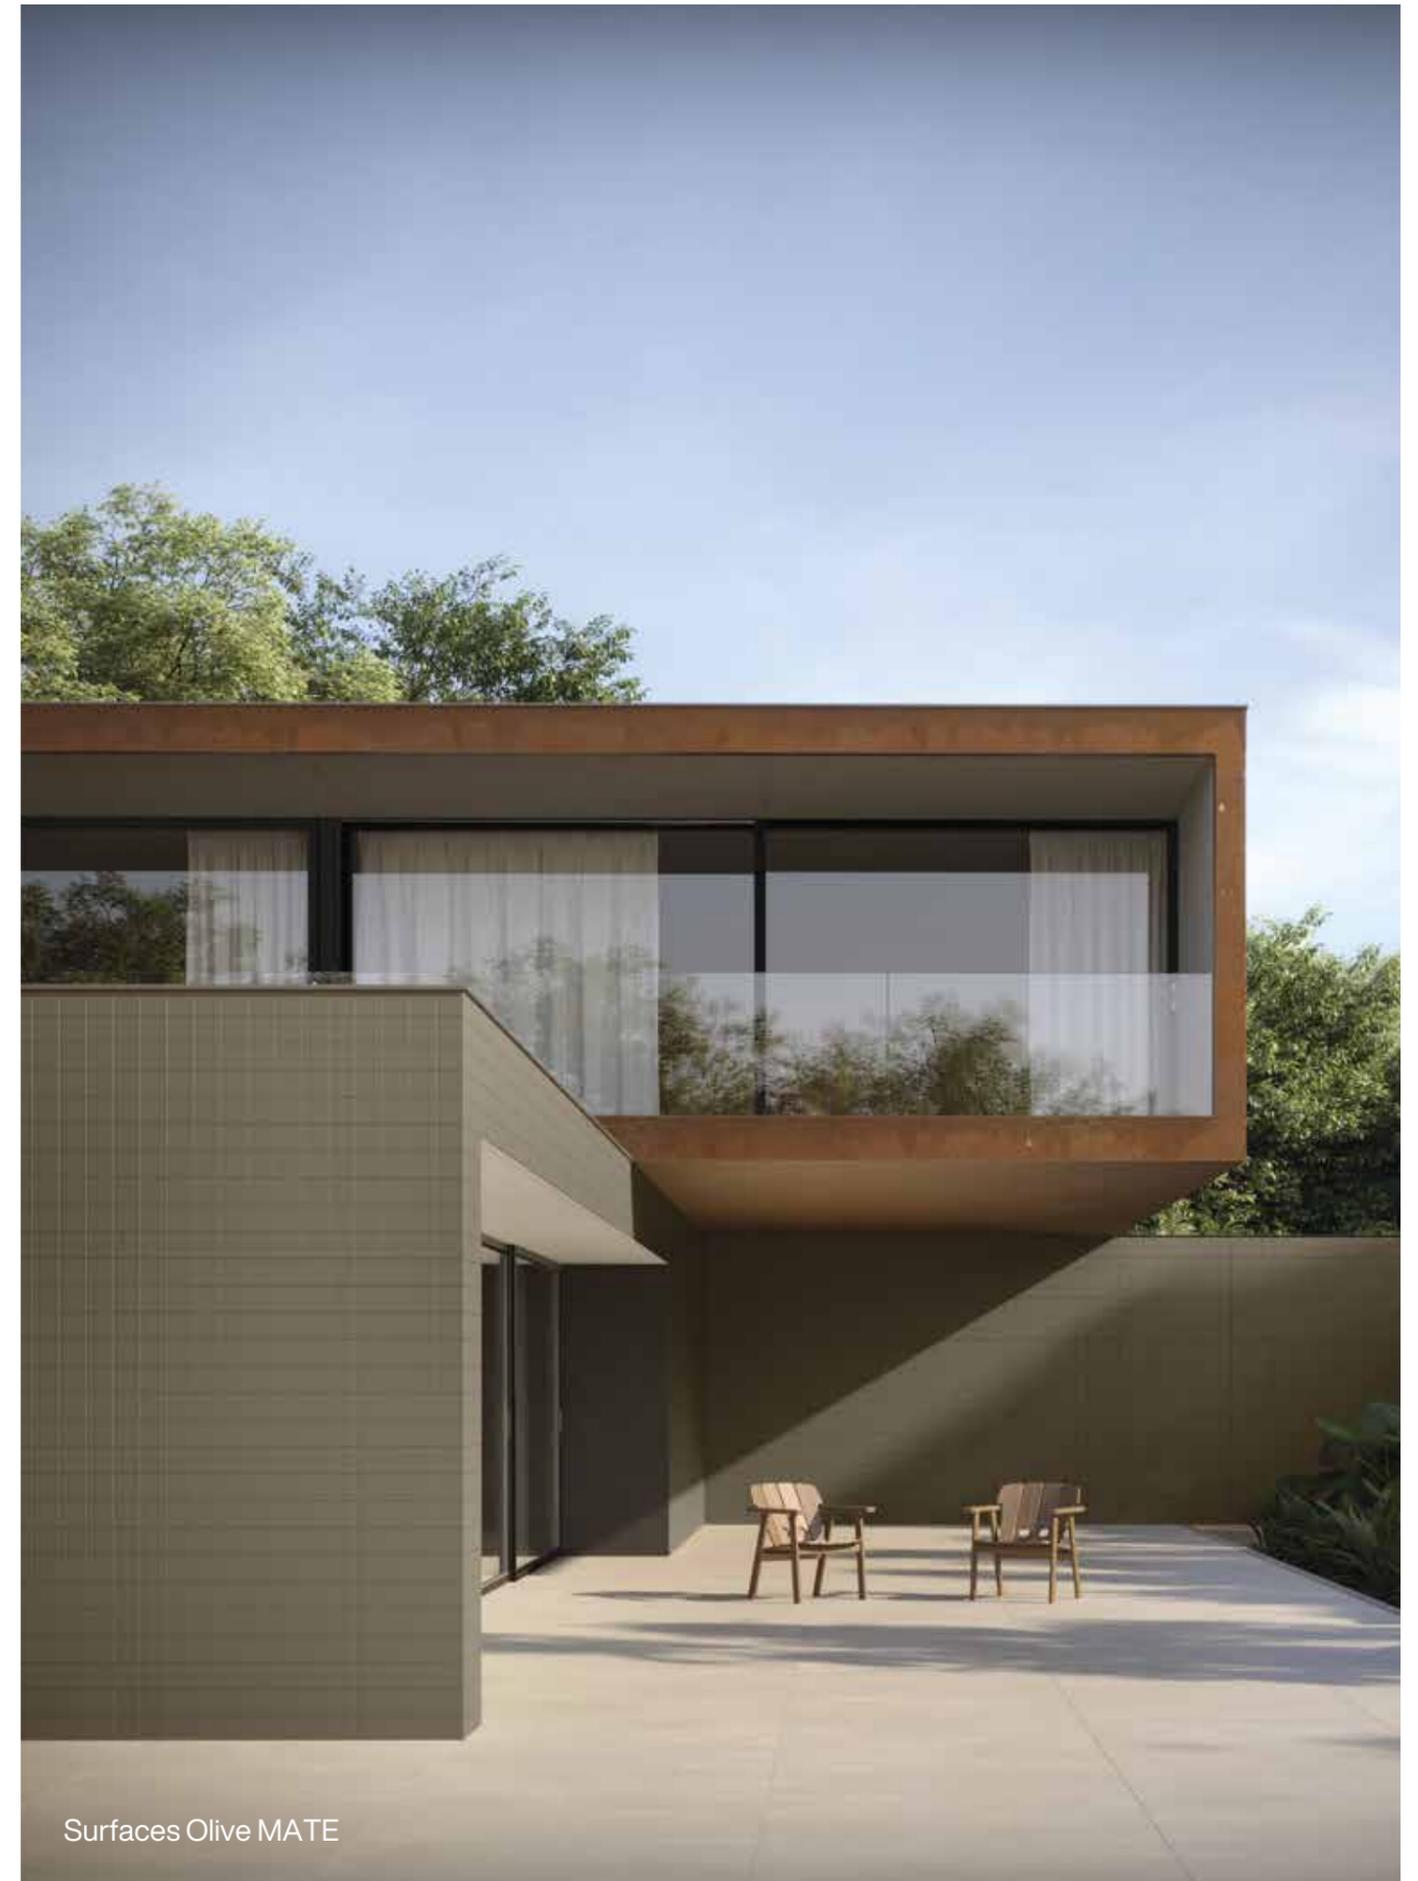

The joints are smaller, reducing the grouting area.

A grout palette of colors to harmonize or contrast with the new system is part of this solution.

Surface is pure color, with technical advantages of ceramic coating.

Ease installation with the bel-point system. Everlasting color. Low maintenance. Portobello design.

Surfaces is the color as raw material for creativity in architecture. Explore this new universe of colors and formats.

# Verre

Transparency reveals the new vintage.

Post-war industrial glass translated into two versions:  
One with a more subtle relief, and another that reproduces  
the fluted pattern.

Small rectangular pieces composed of pieces in 30 x 60 cm  
(11.811 x 23.622 in.) for walls reinterpret the French frames  
of the time and allow for a retro touch in contemporary  
environments.

Verre. Because walls need manifestation.

# Vivant

In a long and remarkable historical passage, Vivant lands in the contemporaneity of enthusiastic and sophisticated homes.

Inspired by the French artistic movement, which emerged at the end of the 19th century - Impressionism was a symbol of a time when paintings portrayed landscapes, highlighted the relationship between space and light, and sought to awaken sensations.

Vivant is powerful, radiant and full of life, adding its vintage esthetic to the modernity of a palette rich in tones that transit from neutral to colorful.

The tones are based on gray, resulting in its unique personality palette.

Among the ten color possibilities, the glossy, matt and Ligne embossed finishes are also protagonists and a true invitation to touch.

Vivant's surface dances to the rhythm of the light, reproducing a charming movement.

Vivacious, resistant and versatile, Vivant covers internal walls and is presented in 10 colors in the 7x24 format.

## White Home

White Home presents limitless options for both sophisticated and creative projects.

The white tone makes the ceramic tile a minimalist choice, but full of personality.
